Abstract

In this talk, Sri. Vijay Bhaskar Reddy Dinnepu will speak about building Innovative products and solutions for IoT based services to deal with a wide set of real-time problems in the field of smart agriculture and other relevant use cases. Cloud based IoT solutions integrated with wireless sensors that have been developed will also be showcased by the speaker. This will lead to customer-centric innovations and commercial success for organizations.

About the speaker

Sri. Vijaya Bhaskar Reddy Dinnepu is a passionate and a seasoned professional with core expertise in Data Networking, Routers, Embedded Software, Deep Packet Inspection and Ethernet Switching. An alumnus of IIT Madras, been an achiever from his school days for his outstanding academic brilliance.

The same brilliance was carried forward from IIT campus to corporate corridors of IT majors in Wipro, Intel and Cisco. His 22 years of corporate stint was galore with awards for his innovation and technology solutions before his entrepreneurial journey with Vinfinet and AgWiQ technologies. He won the following awards and recognition's: Winner of Digitizing India award by Cisco & CNBCTV18 in July 2016, Winner of Sankalp Award for Best Agriculture Startup, India's most prestigious Social Enterprise Award in 2012 Finalist at Mahindra Spark, an innovation and incubation initiative by Mahindra in 2012, Winner of Indian Semiconductor Association Technovation Award in 2011 for OEM Consumer Best Indian Startup and many more to his credit.
