No.CBIT/094/Admn./2021   Dt.22.07.2021

APPEAL TO STUDENTS & PARENTS

Dear Students and Parents,

Noted your concerns. In fact they are our concerns too. We have been receiving such requests in tens of numbers from students, requesting to conduct the classes and exams in online mode. No parent would normally risk their ward in the present situation. At the same time no parent would like to see the career of their children get ruined because of some fears and apprehensions. Life has to move on with due care, protection and guidance. We also have the status of students of other states in mind and gave a thought as to what best can be done to them.

We, at CBIT, never deliberately put our students at risk. It is only in line with other Universities in the State and other neighbouring institutions that we are taking steps to put this thoroughly disturbed professional education calendar into the right groove, in the best interest of you and your career.

We have plans to organize Vaccination camps exclusively for our students, if the number is more than 100. In fact we offered this to all our students some time back and the response from you all was very poor. Students' response at times will be quite unexpected and contradictory. You may be surprised to hear that there are instances in our own institute, of students requesting to organize institute festivals, Convocation programmes etc., in offline mode, in this pandemic situation! It is really important for all of us to be unbiased, thoughtful and positive in our attitudes and approaches, to put ourselves in to the right groove and reconstruct our eluding "new normal life". Hope you would understand the situation in the right spirit and take a right decision.

I/c-PRINCIPAL

P.S: After observing the University Colleges only this decision is taken. You may please once again note that it is not our intention make you risk your lives but at the same time it is our effort not to put your career at stakes.
