To
 All faculty,
 Greetings to you all !!!

As per HoD instructions, with an objective is to update our students on the latest developments in field of chemical engineering applications, INVITED EXPERT LECTURES by industry personnel and successful alumni of chemical engineering are being organised, through Online ZOOM platform for this academic semester.

Please find below the details of speakers, topics and schedule. Zoom links shall be shared as per the schedule.

All faculty are also invited to attend the talks without detrimental class work.

Attendance and Zoom recordings shall be shared with the faculty to update on LMS.

A Brief Report on Invited Guest Lecture

Topic: Role of Chemical Engineers in Pharmaceutical Industries

Date (Day) and time: 20-11-2020 (Friday) from 1:00 PM to 2:00 PM (CET-1 class slot)

Online-ZOOM Platform for faculty and B.Tech Sem-III (2nd year) students

Speaker details:

Mr. Sandeep Badarla,

(Dept. Alumnus – 2014 batch)

Scientist - Process Engineer, API - Process Engineering, Dr. Reddy's labs, Hyderabad.

Email: badarlasandeep@gmail.com

Mobile: +91 - 7680885315

Organised by:

Faculty coordinators:

- 1) Dr. Ravindra Pogaku, Professor & Head
- 2) Dr. Naga Prapurna P V, Associate Prof.,
- 3) Dr. Anita M, Assistant Prof. & Class teacher

Student Coordinators:

- 1) Mr. Pratham Jain (Class representative)
- 2) Mr. Yashraj Delhiwala
- 3) Mr. Aryan Mohan

Attendance:

Faculty attended = 7

Students present = 36

The faculty and student coordinators have initiated the zoom session, introduced the speaker, invited HoD for presenting his opening remarks and also monitored the students' attendance during the session. Dr. P. Ravindra, Prof. & Head has welcomed the speaker, faculty and students. He has complimented the alumnus for his enthusiasm to reconnect with the department and share his experiences for the benefit of the budding engineers. He has highlighted the advantages of such lectures on the students learning outcomes.

Objective of the lecture:

To enlighten the students on role played by chemical engineers in chemical manufacture sector with Pharmaceutical industry as a case study.

Summary of the lecture:

The Guest Lecture highlighted the importance of the various course subjects, unit operations and processes to design and develop manufacturing processes like Semi-Conductors, Nano Technology and Nano catalysis, Food processing, Petrochemicals, Polymers, Water etc.

The challenges handled by chemical engineers were explained that ranged from high precision and rate controlled operations, targeted drug release, environment control, bioprocess development, process optimization, reactions, alternative energy sources, replace usage of metal. As Chemical Engineering is a vast field, it opens its reach to a huge possibilities for startup companies with precision and digital applications.

The pharmaceutical industries are of two types:

- 1) Innovators
- 2) Generics

Innovators:- These industries spend their time and money in formulating the drug for a particular cause, get the drug patented and then release the drug in market. For Example GSK and Pfizer.

Generics:- When the patents filed by innovators get expired, the Generics make the alternative for the drug made by Innovators, which is more affordable and effective. For Example Aurbindo Pharma and Dr.Reddy's Laboratory

There are two types of bulk drug manufacturers:

- 1) Active Pharmaceutical Ingredient(API)
- 2) Drug Substance Manufacturers

Responsibilities of chemical engineers in a Pharma industry may be in the range of:

- Production Engineer:-Takes care of capacity management, Increase in no. of batch production and optimization in process timelines to get high output.
- Project Engineer:-Brings latest facilities to the plant, designing the facility and controlling the process.
- Safety Engineer:-Prevention from a runaway reaction and to keep the plant and the staff safe.
- Business Development:-To marketing and planning to support the growth and expansion.
- Technology Transfer Engineer:-To transfer the technology from R&D team and implement it to the production plant.
- Operational Excellence and CIP:-To bring continuous improvement to the project and improve the efficiency to the yield of drug produced.
- Project Management and Quality Assurance:-To assure the quality of the product according to the ICH guideline.

Roles and functions:

- Safe Process Development:-To take measures to stop an operational catastrophe in plant
- Kilo Lab and CPP:-Optimization in scaling the reaction from lab size to plant size to check the

process parameters.

- Continuous Manufacturing:-To reduce the size of the process reactor to make it cost efficient
- Polymorph Development:-To change the shape of the drug for high effectiveness and engineering the particle form the purpose(Particle Engineering)
- Process Analytical Tools:-Monitoring the reaction on a periodic basis to check the growth of the drug crystals.
- Scale up Development:-Bringing new technology and innovations to the project for its efficiency.

Case study – Addition of an exothermic reagent to a reaction:

- Initial study at lab scale: for example given was 100ml reagent added in 100 minutes.
- Scale-up studies: the average flow rate of the reactant is increased, AKA the time taken to add the same amount of reagent is reduced.
- The amount of the heat generated by any exothermic reaction is calculated that is necessary not only to cool the apparatus, but also to evaluate the risk, scalability, and criticality.
- The criticality of a process is especially important as it is helpful to predict the worst case scenarios or troubleshoot, accurately.
- A device called the reaction calorimeter was introduced as way to measure this quantity accurately in a specific period of time.

Closing remarks by faculty coordinator:

Faculty coordinator, Dr. Naga Prapurna has expressed profound thanks to the speaker for accepting the department invitation at a short notice. The powerpoint presentation and lecture was relevant to the topic for sem-iii students to understand the significance of the chemical engineering course. The speaker was requested to help the department through the following future interactions like:

- Revive the MoU with Dr. Reddys labs, Hyderabad for collaborative academic and research activities.
- Offer collaborative projects for U.G students as part of their sem-viii U.G project work
- Permit students for industrial visit
- Allow students for summer internship work
- Plan to submit projects for funding, in area of mutual interest.

Outcomes of the lecture:

The expert from pharmaceutical field has laid a foundation for the budding chemical engineers to understand the roles, responsibilities, and challenges. To think about the different opportunities lying in pharmaceutical industry for work, design, development and research. The students have understood through the case study as to how they could apply their theoretical learning in such industries.

CHEMICAL ENGINEERING DEPARTMENT

Guest lecture was delivered on “Role of Chemical Engineers in Pharmaceutical Industries” by Mr. Sandeep Badarla, (Dept. Alumnus – 2014 batch), Scientist - Process Engineer, API - Process Engineering, Dr. Reddy’s labs, Hyderabad, on 20th Nov 2020.

Topic: Special electromagnetic machines

Prof. M. Rama Moorthy.

Target:

Duration:

Key points about his lecture..

- ① This lecture related to Special Electromagnetic motor (Schrage motor).
- ② The major objective of this lecture is smooth control of drive without using power electronic converter circuits.
- ③ Schrage motor is a special electric motor has armature on rotor and field coils placed on stator along with brushes.
- ④ It operates as a reverse induction motor.
- ⑤ By adjusting the brush positions the magnitude and frequency of output voltage can be varied.
- ⑥ It is used to interconnect the two different A.C supplies (w.r.t. frequency)
- ⑦ This motor was used in second world war in aircrafts.

Details of Workshop

1. Title of the Workshop: “ **Pattern Recognition and Machine Learning**”
2. Workshop Convener(s): **Dr.P.Narahari Sastry & Sri.M. Ramana Reddy**
3. Date(s) of Workshop: **30th - 31st May 2019**
4. Supported by: **TEQIP**
5. Chief Guest: **Dr. S.K. Udgata**, Professor, University of Hyderabad for the Inaugural session on 30/05/2019. And **Dr. D. Sudhir Reddy**, Scientist, ADRIN, Department of Space, Hyderabad for Valedictory Function on 31/05/2019.
6. Resource Persons and Topics delivered:

S.No.	Name of the Resource Person	Topic Covered
1	Dr.S.K Udgata Professor University of Hyderabad	Introduction to machine learning: Scope, Limitations and Applications
2	Dr. T.V.Rajanikanth , Professor, SNIST, Hyderabad.	Machine learning Algorithms Implementation
3	Dr. D. Sudhir Reddy Scientist- F, ADRIN Dept of Space, Hyderabad	Function Approximation and data Models
4	Dr.P.Narahari Sastry Dept of ECE, CBIT, Hyderabad	Pattern Recognition Applied to palm Leaf character recognition

7. Number of delegates: **37 (Faculty (15) + Research Scholars (22))**
8. **Outcomes of workshop:** This Workshop provided a platform for young Researchers and faculty members to understand the basic concepts in Pattern Recognition and Machine Learning. These concepts were very much useful in developing various algorithms in many application areas like biometrics, handwriting recognition, robotics and many more upcoming research topics of their in their Ph.D work. In the first session Dr. S.K. Udgata gave a detailed lecture on the scope covered by Machine learning algorithms. Further he also discussed the applications involved with machine learning and the limitations were also listed. Dr. T.V. Rajanikant continued the second session by teaching the implementation part of the algorithms related to robotics and biometrics. Dr. P. Narahari Sastry covered the lectures related to Pattern recognition applied to palm leaf characters, which was very informative and the audience showed lot of interest in the subject. Dr. D. Sudhir Reddy gave insight and mathematics involved in the machine learning algorithms. Some of the participants have suggested for providing Practical sessions on Machine learning. Further they have expressed that this type of workshop should be conducted for a week long instead of 2 days in future programs. The participants expressed that the speakers were very good in this subject domain.

BRIEF REPORT ON A ONE-DAY SEMINAR

Artificial Intelligence /Internet of Things

On 5th February 2019, a seminar entitled “Artificial Intelligence /Internet of Things” organized by the department of ECE in association with Redpine signals. About 120 students from ECE have attended the seminar. Mr. Govardhan Mattela and Mr. Devanjan Sikdar are the speakers for this program.

To enable us with the latest industry knowledge in AI, IoT, and Edge Intelligence, Redpine Signals has the design of AI and IoT Innovation Lab. The lab can be used by students to learn Artificial Intelligence, Machine Learning, Internet of Things from both software and hardware point of view. The lab aims to introduce students to the latest industry trends in the area. The purpose of the workshop was to bring together the industry and the institute collaboration to establish a new laboratory on artificial intelligence and internet of things.
