A guest lecture on "Cognitive Radio" was delivered by Dr. Ashish Pandharipande on 16-07-2018 for third and final year students in N-Block Seminar hall. About 114 participants including, faculty and UG students have attended the lecture.

Sir spoke about Cognitive Radio. Cognitive radio (CR) is a form of wireless communication in which a transceiver can intelligently detect which communication channels are in use and which ones are not. The transceiver then instantly moves into vacant channels, while avoiding occupied ones. These capabilities help optimize the use of the available radio frequency (RF) spectrum. It also minimizes interference to other users. And, by avoiding occupied channels, it increases spectrum efficiency and improves the quality of service (QoS) for users. The allocated (licensed) spectrum is not always used optimally. As a result, some bands are overcrowded (e.g., GSM cellular networks), while others are relatively unused (e.g., military). This spectrum inefficiency limits the amount of data that can be transmitted to users and lowers service quality.

As the number of connected devices in use continues to grow, this limited resource is fast becoming a *scarce* resource. Cognitive radio is an efficient way to use and share this resource intelligently, optimally and fairly.

## **:Report:**

Department of CSE, has conducted a Guest Lecture on Border Gateway Protocol

**Date & Time:** 02-08-2018, 3 to 4 PM

**Agenda:** Guest Lecture on Border Gateway Protocol

**Speaker Profile: Name :** Mr.Charanjith Marvaha,Sr.Lecturer Birmingham City University

### **Presentation:**

During the event : Mr.Charanjith addressed that Border Gateway Protocol (BGP) is the postal service of the Internet. When someone drops a letter into a mailbox, the Postal Service processes that piece of mail and chooses a fast, efficient route to deliver that letter to its recipient. Similarly, when someone submits data via the Internet, BGP is responsible for looking at all of the available paths that data could travel and picking the best route, which usually means hopping between autonomous systems.

In this simplified model, the decision seems straightforward. The AS2 route requires fewer hops than the AS6 route, and therefore it is the quickest, most efficient route. Now imagine that there are hundreds of thousands of ASes and that hop count is only one part of a complex route selection algorithm. That is the reality of BGP routing on the Internet.

The structure of the Internet is constantly changing, with new systems popping up and existing systems becoming unavailable. Because of this, every AS must be kept up to date with information regarding new routes as well as obsolete routes. This is done through peering sessions where each AS connects to neighboring ASes with a TCP/IP connection for the purpose of sharing routing information. Using this information, each AS is equipped to properly route outbound data transmissions coming from within. Mr.A.Mohan, Asst Prof delivered the vote of thanks. Event enthusiastically hosted by Prof.Y.Ramadevi , HOD,CSE Department. Total 145 second year students participants has joined the session.

LECTURE DELIVERED BY: G. HARIHARA IYER

DESIGNATION: ENERGY AUDITOR TIME: 11:30 AM to 01:00 PM

TOPIC: ENERGY CONSERVATION AWARENESS PROGRAM

FACULTY, PCRA

*my friend*

① Mainly discussed about i) Energy walk <sup>my friend</sup> ii) Energy efficient about <sup>my friend</sup> Hestins

→ Thermal power plant Installation cost will be 8-10 crores per MW, so reduces losses to save the energy.

→ cutting of trees, burning of fossil fuels these are man made disasters because of these we have global warming effects, climatic changes, water scarcity, rising temp.

→ Diesel, petrol & crude oil should be imported from other countries than <sup>my friend</sup> with electricity.

→ Best way of prep of food with no utilization of energy like sprouts, seeds

→ Energy efficient can be taken by adjusting to the temperature around 26°C to conserve fuel for AC.

→ Be energy efficient to gain higher profits & keeping only lower pollution

→ Use the equipment or a machine to its full capacity utilization

→ Energy Audit Instruments used by us for instant & trend measur - to measure chke, clamp on meter, power quality, fans flow temp, lux meter.

While we make us utilizing less capacity then go with lesser rating <sup>like</sup> m/c

→ Energy eff. rating <sup>like</sup> CFL, electronic chke, LEDs, Natural light, <sup>my friend</sup> Tm

→ "SAVE ENERGY SAVE OUR PLANET" is the moto of the session.

Test conducted on the energy conservation and prizes given to students.
