ABOUT THE FDP

This FDP aims to provide an invaluable opportunity for faculty members, researchers, and students to expand their horizons in emerging areas of computer science and engineering through the domain's: Cyber security, AI/ML, Computing paradigms (cloud, fog and edge), Blockchain, IoT. It will drive the participants in a research-oriented direction to enable them to choose a suitable area of expertise and progress with publications and submission of project proposal for funding. The participants will also be able to take part in hackathons, enhance their knowledge both theoretically and practically. It also helps to identify future research needs in interdisciplinary emerging areas.

FDP CONTENTS

1. Introduction to 5G Networks & Cyber Security
2. Research Impact on Cyber Security
3. Few and Zero Shot learning
4. Real time case studies on Machine Learning
5. Analysis on cloud computing
6. Fog and Edge Computing
7. Security with Blockchain
8. Working with Smart Contracts
9. IoT with cloud and Blockchain use-cases
