Sat, Jun 22, 2024 at 4:57 PM

Dear Sir

Some of the students (3rd year going to 4th year) are requesting for Internships through the AICTE IDEA Lab, focusing on a Product and Industry-oriented approach with the theme of **Industrial Entrepreneurship**. This internship aims to provide students with experience in an industrial environment, product development, Design thinking Approach, Business model, Technical and Business Plan, and Minimum Viable product development details. These skills are crucial for fostering creativity, innovation, industry readiness, and enhancing employment opportunities.

The internship will be tailored to meet industry requirements while aligning with students' career growth needs and the Government of India's "Viksit Bharat" initiatives. It will also address solutions to the challenges faced by industries and address some of the Sustainable development goals(SDGs). The program will encompass applications and requirements for both core and non-core engineering branches, as well as on emerging technologies for Industrial innovations, Technical reports, business plan preparation, Idea about Company formation, and pitching.

A fee of Rs 500/= will be collected from each student to cover the honorarium for industry experts, MSME experts, and R&D organization experts, as well as expenses for printed certificates, stationery, industry visits, and other costs incurred by the AICTE IDEA Lab during the program. **No honorarium will be provided for internal resource persons.** The program module is currently being prepared by the AICTE IDEA Lab. The Internship will be for a period of a minimum 90 Hrs as per the guidelines covering lecture sessions, project Idea Reports, Business Plan, and presentations. The program will be on Hybrid mode. Mentors from various core and Non-core branches will be identified for mentoring. An extract from the IDEA Lab guidelines is enclosed for reference.

Approval may be accorded to offer the above-mentioned Internship by AICTE IDEA Lab.

Extract from AICTE IDEA Lab Manual

Q. What is an IDEA Lab & what is the idea behind it?

- A. The purpose of IDEA Lab is to provide all facilities under one roof, for conversion of an idea into a prototype. With these facilities in the campus, more students and faculty will be encouraged to take up creative work and in the process, get training on creative thinking, problem solving, collaboration etc. which conventional labs are not able to. The focus will be on training students so that they become imaginative and creative and stay so at the workplaces they join. The whole idea is to transform engineering education with such a Lab in all colleges and for this they must proactively expose all students to the IDEA Lab, organize training sessions for interested students as well as support projects and by providing online learning materials.

Teachers must also get trained in these Labs to know their scope and opportunities in teaching learning processes as well as research and development projects. They should encourage the students to take up and themselves get involved in activities, projects, internships which involve utilization of such Labs. They must strive for creating problems/ projects/ internships in their own subjects/ disciplines and mentor the students.

Industrial Internship Certificate Distribution List Dec-2024

05-12-2024
