Internship Experience Certificate

This is to certify that Ms. Geetanjali Pamidimalla studying B.Tech (Civil) from Chaitanya Bharathi Institute of Technology (CBIT) has successfully completed her internship program of 3 weeks.

Her internship tenure was from 20th November 2023 to 8th December 2023 and worked on Working Capital Management and was actively & diligently involved in the project and tasks assigned to her.

During the span, we found her to be a sincere, intelligent, hardworking, and creative student with a very good grasping power. We have always observed her that she is very eager to learn, acquire knowledge and spend more time on the subject. Her learning powers are very good, and she picks up rapidly. Quality of her work and evaluation proved that she gives utmost priority to work. Moreover, her interpersonal and communication skills are brilliant.

We wish her a bright future.

ACTIVITY REPORT ON SITE VISIT TO NIRDPR

Department of Civil Engineering conducted a study tour for B.E. Civil Engineering, I-Semester (Sections: A1 and A2) as a part of Community Engagement Course Work to National Institute of Rural Development and Panchayat Raj (NIRDPR), Rajendranagar, Hyderabad on 18-01-2023. Sri P. Srinivas Reddy, Dr. K. Srikanth and Sri E. Maheshwar Reddy, Asst. Professors., CED were the faculty coordinators for the visit.

1. Name of activity / event: Site Visit to National Institute of Rural Development and Panchayat Raj
2. Programme: Community Engagement course work programme
3. Activity/ Event Venue and Date: 18-01-2023, NIRDPR, Rajendranagar, Hyderabad
4. Nature of Participants: First year Students of Civil Engineering branch (Section: A1 and A2)
5. No. of Participants: 122
6. Student Coordinator: S. Srividya and M. Siddhardha
7. Faculty Coordinators: Sri P. Srinivas Reddy, Dr. K. Srikanth and Sri E. Maheshwar Reddy, Assistant Professor, CED.

The Industrial Visit organized by the Civil Engineering Department to the National Institute of Rural Development and Panchayatraj (NIRDPR) on 18-01-2023 was a highly informative and enriching experience for the first-year students.

The itinerary of the visit, starting with an induction lecture at the technical park and then proceeding to explore various aspects of sustainable construction practices, reflects a well-structured and educational program.

The hands-on experience of observing houses constructed using compressed stabilized earth blocks and natural materials such as stone and bamboo must have provided the students with practical insights into alternative construction methods that are both eco-friendly and cost-effective.

Moreover, facilities like the vermicomposting pit, dying unit, handmade paper manufacturing unit, and biogas unit would have exposed the students to a range of sustainable practices beyond just construction, including waste management, renewable energy, and resource recycling.

Overall, such industrial visits play a crucial role in supplementing theoretical knowledge with practical exposure, fostering a deeper understanding of sustainable development principles among future civil engineers.

Report on

TGERL Visit on 23rd May 2024

**Location: TELANGANA ENGINEERING RESEARCH LABORATORIES (TGERL),
HIMAYAT SAGAR**

Date of the Visit: 23 May 2024

1. Purpose of Visit

The primary objective of this field visit was to provide students with practical exposure to hydraulic model studies. This visit aimed to bridge the gap between theoretical knowledge and real-world applications in hydraulic engineering.

2. Key Learnings

During Field visit to the Telangana Engineering Research Laboratory (TGERL) at Himayat Sagar, students learned about various Hydraulic models and their applications. They explored the section models of the Annaram Barrage, focusing on the adequacy of ventways and energy dissipation, which prevents erosion and structural damage. Additionally, students examined the composite model of the Sandul Barriage, which provided insights into flow patterns and gate operation schedules, crucial for optimizing water flow management and ensuring the efficiency and safety of the structure. These models play a vital role in analyzing and enhancing the design and operation of water management projects.

2.1 Sectional Models

Students were introduced to the section model (2-D model) of **Annaram Barrage** which was constructed to serve the purpose of irrigation. Sectional Model was a cross-sectional representation of structures used to study specific engineering aspects and was constructed in flumes.

The objectives of studying sectional models are-

- i) Adequacy of Ventways: This aspect involves ensuring that the ventways (openings) in the structure are adequate to handle the designed flow of water without causing upstream flooding or structural failure.
- ii) Energy Dissipation: This focuses on the mechanisms by which the structure dissipates the energy of flowing water, crucial for preventing downstream erosion and ensuring the stability of the structure.

2.2 Composite Models

Students observed the composite model (3-D model) of the **Sandul Barrage** which was constructed for the purpose of irrigation, which integrates multiple aspects of the structure into a single model for comprehensive analysis reproducing real field.

The model is used for study of:

- i) Flow Patterns: This part of the model helps in understanding the behavior of water flow through and around the barrage, which is essential for optimizing design and operation.
- ii) Gate Operation Schedule: The model aids in planning the operation schedule for the gates, ensuring efficient water management by determining the best times and methods for opening and closing gates to control water flow.

3. Conclusion

The models were demonstrated by Sri. R. Gowtham Kumar, Research Assistant. Faculty members have discussed with Sri. S. V. S. Durga Prasad, Research Officer for possible inputs required for model setup in flume at FM&HM lab, CBIT. The field visit to Telangana Research Laboratories was a valuable educational experience for the Civil Engineering students of CBIT. It provided students with a deeper understanding of hydraulic model studies and their significance in civil engineering projects and taken output for model setup in FM&HM Lab for In-house project.

Ten students (ME- 1 student and BE- 9 students) have attended this visit. The visit was coordinated by the faculty members Dr, Jnana Ranjan Khuntia, Dr. Kamalini Devi and Sri Ramanarayan S., Assistant Professors, Department of Civil Engineering, CBIT (A).

A Site Visit to SRR Sriram River View project at Narsingi, Gandipet Main Rd, Manchirevula

A site visit to SRR Sriram River View project at Narsingi, Gandipet Main Rd, Manchirevula is completed on 25th November 2023. The site is a 13.07 acre gated community which is currently in the construction phase.

Visit to the SRR Sriram River View project was planned for the interns to make them understand the practical aspects of civil construction works. The project is construction of a community living with several facilities including water treatment plant, sewage treatment plant, etc. The community include 10 blocks of G+11 storeyed buildings. At the basement there is a two floor car parking facilities. The buildings are in construction phase.

In addition, one batching plant with capacity of 15 m³ and one fully automatic brick manufacture plant are available at the site. Both the plants are working very efficiently. Those plants are extensively used in current time in different high rise building constructions. For the brick preparation they are using Fly ash, a waste material that can partially replace the cement. The site engineer and other team members were very cooperative and explained each and every facility clearly to our students/ Interns. A total of 40 Interns have participated in this visit. Three faculty members, Dr. Angshuman Das, Dr. Kamalini Devi, and Dr. Dudam Bharath Kumar, Assistant Professors, Department of Civil Engineering, CBIT (A), accompanied the students for the visit.
