A REPORT ON THE GUEST LECTURE

“Converting your Idea and Projects to Product and Patents”

CONDUCTED BY DEPT. OF MCA

By Dr. U.K. Choudhury, Professor, Dept. of EEE, CBIT.

Date of the Lecture: 11-04-2024

Venue: PG 301

Participants: MCA II & IV semester students

About the Speaker:

Dr. U.K. Choudhury is the Professor in EEE and Advisor, Incubation & Innovation, CBIT. He will be talking about Idea to Prototype and Patent Conversion and achieving minimum viable product an Industry Perspective.

Faculty Coordinators:

1. Dr. GNR Prasad Asst. Professor, Dept. of MCA

About the Guest Lecture:

A guest lecture on "Converting Your Idea and Projects to Products and Patents" was held at PG 301, MCA classroom. The session was organized to guide students and researchers on how to transform their innovative ideas and academic projects into commercially viable products and protect them through intellectual property rights.

Objectives:

The primary aim of the lecture was to enlighten the students on:

HEAD OF DEPARTMENT
Master of Computer Applications
C.B.I.T., Hyderabad-500 075

1. The significance of innovation in today's competitive world.
2. The step-by-step process of converting ideas into tangible products.
3. Understanding the basics of patents and their role in safeguarding inventions.

The lecture commenced with a warm welcome to the speaker, followed by a brief introduction of their achievements and expertise. The speaker emphasized the importance of nurturing innovative ideas and provided practical insights into bridging the gap between ideation and commercialization.

The Outcome of the Guest lecture:

The lecture concluded with a highly engaging question-and-answer session where participants sought clarification on various aspects, including patent laws, funding opportunities, and global markets. The speaker provided detailed and encouraging responses, inspiring participants to pursue their ideas with confidence.

The guest lecture was an enlightening experience for all students, offering valuable insights into the journey of innovation, product development, and patenting. It motivated students and researchers to think beyond academics and explore entrepreneurial opportunities.

CBIT Workshop: Idea to Prototype and Patent Conversion

DECCAN NEWS SERVICE
HYDERABAD

As part of the Institution's Innovation Council (IIC) Self Driven Activity for Q3, Chaitanya Bharathi Institute of Technology (CBIT) organized a workshop for MCA students on Idea to Prototype and Patent Conversion.

Prof. U.K. Choudhury, Advisor for Incubation & Innovation at CBIT, highlighted the benefits of the innovation

process and outlined the five main steps involved. He emphasized the importance of

Technology Readiness Levels (TRLs) in understanding technology maturity. Additionally,

he explained the significance of prototypes in testing product viability and the role of patents in protecting inventions. Dr. GNR Prasad and Dr. M. RamChander, faculty from the Department of MCA, spearheaded the event. MCA students, including Dr. B. Indira, Sri Krishna Prasad, Smt T S Praveena, and Sri Kondal Reddy, actively participated in the workshop, gaining valuable insights into innovation and patent conversion.

A REPORT ON THE GUEST LECTURE

“THE IMPORTANCE OF SOFT SKILLS IN IT INDUSTRY”

CONDUCTED BY DEPT. OF MCA

Date of the Lecture: 09-03-2024

Venue: MCA LAB- II

Participants: MCA II semester students

About the Speaker:

Ms. U Bhavani , A software developer from Globallogic Solutions Limited , Bengaluru and an alumni of MCA department, 2019 batch.

Faculty Coordinators:

1. Dr. GNR Prasad Asst. Professor, Dept. of MCA
2. B. Srinivasa S P Kumar, Assistant Professor, Dept. of MCA.

About the Guest Lecture:

The guest speaker spoke about the importance of soft skills. She said Soft skills are personal attributes that influence how well you can work or interact with others. These skills make it easier to form relationships with people, create trust and dependability, and lead teams. In essence, they are essential for your success in the workplace, your company’s success and your personal life.

Most interactions with other people require some level of soft skills. At a company you might be negotiating to win a new contract, presenting your new idea to colleagues, networking for a new job, and so on. We use soft skills every day at work and developing these soft skills will help you win more business and accelerate your career progression.

HEAD OF DEPARTMENT
Master of Computer Applications
C.B.I.T., Hyderabad-500 075

On the other hand, a lack of soft skills can limit your potential, or even be the downfall of your business. By developing strong leadership, delegation, teamwork, and communication abilities, you can run projects more smoothly, deliver results that please everyone, and even positively influence your personal life by improving how you interact with others. The convenor of this lecture Dr. GNR Prasad said about students must know the soft skills while pursuing their degree courses. The co-convenor of this lecture Sri B. Srinivas S. P. Kumar proposed vote of thanks. The staff and students of MCA Department have participated actively in this programme.

The Outcome of the Guest lecture:

These type of lectures helps the institute to leverage with software industries. The outcome of a guest lecture on the importance of soft skills in the IT industry is likely to result in increased awareness, improved skill development, better interpersonal relationships, and enhanced career prospects for the students.

Unlocking Success: Guest Lecture on Soft Skills in the IT Industry

DECCAN NEWS SERVICE
HYDERABAD

The MCA Department of CBIT organized a guest lecture titled "The Importance of Soft Skills in the IT Industry." Ms. U Bhavani, a software developer from Globallogic Solutions Limited, Bengaluru, emphasized the significance of soft skills. She highlighted how these personal attributes facilitate effective interaction, trust-building, and team leadership, essential for workplace success and personal growth. Ms. Bhavani stressed that soft skills are integral in various professional interactions, from negotiations to network-

ing, and their development accelerates career advancement. Conversely, a lack of soft skills can hinder progress and impact business outcomes negatively. Dr. GNR Prasad, the lecture's convener, emphasized the importance of soft skills

for students pursuing degree courses, as it enhances institute-industry collaboration. Sri B. Srinivas S. P. Kumar, the co-convener, extended a vote of thanks. The active participation of MCA Department staff and students contributed to the success of the event.

A REPORT ON THE KEYNOTE LECTURE “NAVIGATING CARRER PATHS”

CONDUCTED BY DEPT. OF MCA

Date of the Lecture: 26-02-2024

Venue: SMS-201 (PG BLOCK)

Participants: MCA II and IV semester students

About the Speaker:

Mr. Chandra Mouli is an expert in QA and Delivery Management, SRnD Global, Hyderabad. He has briefed about the latest trends in IT and career opportunities.

Faculty Coordinators:

Dr. GNR Prasad Asst. Professor, Dept. of MCA, CBIT (A) and Dr. B. Indira, Associate Professor, Dept. of MCA.

About the Webinar:

The keynote address titled "Navigating Career Paths" provided a comprehensive exploration of the intricacies involved in shaping and advancing students's professional journey. The keynote speaker, Mr. Chandra Mouli, an esteemed expert in IT field delivered an insightful presentation on understanding the dynamics of career development.

The Objectives of the Guest lecture are:

1. Self-Discovery and Reflection
2. Adaptability and Lifelong Learning
3. Embracing Challenges and Failures
4. Goal Setting and Strategic Planning

HEAD OF DEPARTMENT
Master of Computer Applications
C.B.I.T., Hyderabad-500 075

The Outcome of the Guest lecture:

The keynote address on "Navigating Career Paths" provided a holistic perspective on career development, blending personal anecdotes with practical advice. Students were equipped with valuable insights, actionable strategies, and a renewed sense of purpose in shaping their professional journeys.

Keynote Speaker Mr. Chandramouli being presented a bouquet

DEPARTMENT OF MCA

A REPORT ON THE NATIONAL LEVEL WEBINAR ON “Enterprise Content Management Systems”

The details of the webinar are given below

Topic	:	A Webinar on “Enterprise Content Management Systems”
Guest Speaker	:	Mr. Rishabh Verma, Software Engineer & Adobe Certified Developer, Capgemini, Mumbai.
Venue	:	CBIT – MCA LABS (ONLINE)
Date	:	13-02-2024
Time	:	2.30 PM - 3.30 PM
Webex link	:	https://cbithyd.webex.com/cbithyd/j.php?MTID=m2469f53e0d7597b17e7210aab8f55701

About the Speaker:

Mr. Rishabh Verma is a certified Adobe Experience Manager Developer, with result oriented and proven track record in implementing solutions. Proficient in AEM technologies including Slightly Apache Sling and OSGi configurations.

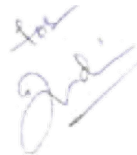

Faculty Coordinator:

1. Mr. P.Krishna Prasad, Asst. Professor, Dept. of MCA, CBIT(A).
2. Dr. M.Ramchander, Asst. Professor, Dept. of MCA, CBIT(A).

Student Coordinators

1. Supraja, MCA IV Semester
2. Vamshidhar, MCA II Semester

Participation

HEAD
Department of MCA
Chaitanya Bharathi Institute of Technology
Gandipet, Hyderabad-500075, India

The total number of participants as it is mainly for the MCA 1st and 2nd students were 90

Brief description of the webinar

The speaker gave a brief introduction about Enterprise Content Management Systems and the types of content management system like CCMS, ECMS, WCMS, DMS, DMS . He elaborated on ECMS Enterprise Content Management System and types of CMS Headless , Hybrid and Suite Concepts . He also discussed about AEM Adobe Experience Manager a comprehensive content management solution for building websites, mobile apps, and forms .it makes easy to manage your marketing content and asserts. At the end he gave a demo of how to use AEM .

OUTCOME

The participants were able to gain the knowledge on ECMS and AEM concepts

Photos

The image shows a screenshot of a webinar. The top portion is a slide with a teal background and white text that reads "Enterprise Content Management Systems". Below the title, the name "Rishabh Verma" and the title "Adobe Certified Developer" are displayed. To the right of the text are four icons: a mountain range, a film strip, an envelope, and a list with four items. The bottom portion of the image is a video feed of a man with a beard and a headset, wearing a plaid shirt. A name tag at the bottom of the video feed reads "Rishabh Verma • Unverified" with an upward arrow icon. In the top right corner of the video feed, there is a circular icon with a square and an arrow. In the bottom right corner of the video feed, there is a signature and a stamp that reads "HEAD Department of MCA Chaitanya Bharathi Institute of Technology Gandipet, Hyderabad-500 075, Tel...

Dt: 27-12-2023

CIRCULAR

The Department of MCA is organizing an Guest Lecture on 29-12-2023 from 2.00 PM to 4.00 PM through online mode. The details of the talk are as follows:

Title of the talk	:	“Java Stream API”
Speaker Name	:	Mr. CNVBR Sri Gowrinath
Date & Time	:	29-12-2023, 2.00 PM – 4.00 PM
Venue	:	Lab I & Lab II of MCA

Mr. CNVBR Sri Gowrinath is currently working as Specialist Learning Infosys, Hyderabad, Telangana, India

All the students of MCA of II semesters are required to attend the talk. The attendance will be taken by the concerned class teachers. Interested students and faculty of other departments are welcome to attend.

The faculty coordinators for the Alumni talk are Dr. B. Indira and Mr. Ramesh Ponnala.

A REPORT ON GUEST LECTURE ON

“JAVA STREAM API”

CONDUCTED BY DEPT. OF MCA

Date of the Guest Lecture: 29-03-2023

Venue: MCA LABS – I & II, CBIT.

The Total number of participants were: 35 students

About the Speaker:

Mr. CNVBR Sri Gowrinath is currently working as Specialist Learning, ETA Infosys, Hyderabad, Telangana, India

The faculty coordinators for the Alumni talk are Dr. B. Indira and Mr. Ramesh Ponnala.

About the Guest Lecture:

A guest lecture on "Java API Streams" was organized for the MCA students to provide insights into modern programming paradigms and to bridge the gap between academic learning and industry practices.

Objectives of the Lecture:

1. To introduce students to Java API Streams and their significance in functional programming.
2. To understand stream processing and how it simplifies data manipulation in Java.
3. To explore real-world applications and best practices in utilizing Java Streams for efficient coding.

HEAD OF DEPARTMENT
Master of Computer Applications
C.B.I.T., Hyderabad-500 075

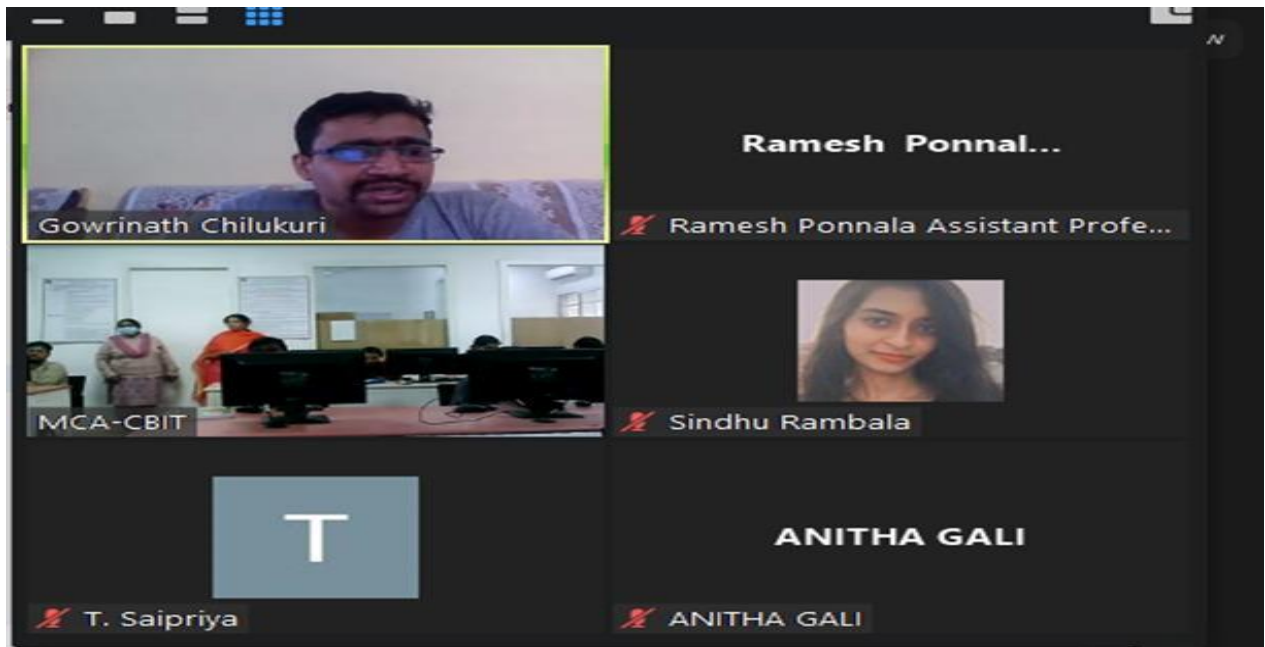

The Outcome of the Guest lecture:

The guest lecture successfully enriched the students' knowledge about Java Streams and their practical applications. It also motivated them to explore advanced features of Java programming. Such sessions are instrumental in preparing students for real-world challenges in software development.

CBIT MCA Department Hosts Guest Lecture: Exploring Java Stream API

DECCAN NEWS SERVICE
HYDERABAD

The MCA department at CBIT College organized a guest lecture on Java Stream API, featuring Mr. Gaurinath, a Specialist Learning professional at Infosys-Hyderabad. The lecture, held online, delved into the distinctive features of Java Stream. Emphasizing that streams do not alter

the original data structure, Mr. Gaurinath explained their input sources and highlighted terminal operations that conclude streams. He also noted the abundant job opportunities in this sector. The event was orchestrated by Mr. Ramesh Ponnala and Dr. B. Indira, with the participation of various faculty members and students.

DEPARTMENT OF MCA

Presents National level Webinar on

Topic	: Navigating the Intelligent Era
Guest Speaker	: Mr. Vineet Goyal
	: Automation and Integration Engineer at Ericsson, ML Developer at Rave Energy.
Venue	: https://cbithyd.webex.com/cbithyd/j.php?MTID=mb33baf9457f7d6bfea172ec7a61c0e75
Date	: 07-07-2023
Time	: 10 AM – 12PM

Abstract

The webinar focuses on insights into Artificial Intelligence, Natural Language Processing, Data Science, Big data and Cloud Computing. Also gives an overview of Machine Learning Algorithms and various models.

About the Speaker:

Currently developing Autonomous Driving with Uncertainty Detection. Developed code to run different components of the docker file to run with different configurations. Developed code to automate docker image pull and save and to scale up and scale down different components of Kubernetes. Enhanced Helm charts to handle high no. of productions. Worked on automating the delivery process of documents and codes for client

What is Data Science? What are different job roles possible?

Data Science:

- Data Collection: Gathering relevant data from various sources.
- Data Cleaning: Removing noise, handling missing values, and ensuring data quality.
- Exploratory Data Analysis (EDA): Descriptive statistics and data visualizations to gain insights.
- Feature Engineering: Selecting, transforming, and creating input variables for machine learning models.
- Machine Learning Modeling: Building predictive models using algorithms.
- Model Evaluation: Assessing model performance and tuning hyperparameters.
- Deployment and Monitoring: Integrating models into production and tracking performance.

Job Roles:

- Data Scientist
- Machine Learning Engineer
- NLP Engineer
- Computer Vision Engineer
- Data Engineer
- AI / ML Research Scientist

Time	: 9.30 AM – 10.30 AM

Abstract

The webinar focuses on insights on IoT and real time applications. Also gives an overview of Machine Learning Algorithms and various models.

About the Speaker:

Mr. Sandeep Kalari is an alumni of MCA department. He is presently pursuing his masters Old Dominion University, Virginia, USA.

Faculty Coordinators:

M.Kalidas, Assistant Professor, Dept. of MCA, CBIT(A)

Mr. P.Krishna Prasad, Asst. Professor, Dept.of MCA, CBIT(A).

A REPORT ON THE GUEST LECTURE ON “IoT AND REAL-TIME APPLICATIONS”

CONDUCTED BY DEPT. OF MCA

Date of the Guest Lecture: 10-06-2022

Venue: MCA LAB- I & II, CBIT

The Total number of participants were: 50 students

About the Speaker:

Mr. Sandeep Kalari is an alumni of MCA department. He is presently pursuing his Masters in Old Dominion University, Virginia, USA.

Faculty Coordinators: Mr. M. Kalidas and Mr. P.Krishna Prasad, Dept. of MCA

About the Webinar:

The webinar focuses on insights on IoT and real time applications. Also gives an overview of Machine Learning Algorithms and various models. The speech content included Introduction to IoT, IoT Architecture and Components, Real-Time Applications of IoT, Challenges and Security Considerations and Real-Time Data Processing.

Outcome of the Webinar

The guest lecture on IoT and Real-Time Applications proved to be an enlightening and thought-provoking event, providing a platform for attendees to explore the vast potential of IoT and its impact on real-time data processing. The knowledge imparted by Mr. Sandeep Kalari will undoubtedly contribute to the continued growth and innovation in the field of IoT.

Software Engineering Prototype Development.

- Software development refers to a set of computer science activities dedicated to the process of creating, designing, deploying and supporting software.
- Software itself is the set of instructions or programs that tell a computer what to do.

System Software		Application Software
Enables the computer to function properly.	Usage	Enables users to work efficiently with documentation such as letters, accounting reports and presentations.
Compulsory – each computer must have a system software to function.	Need	Optional – depends on usage and needs. Without an application software, the computer is still able to function.
Each computer only needs one system software.	Number of software	Each computer can have more than one application software.
Independent – system software can function without an application software.	Dependency	Dependent – application software cannot work without system software.
Provides the environment in which the applications run.	Function	Provides the environment to enable users to accomplish specific tasks.

Examples and types of software

Among the various categories of software, the most common types include the following:

- **Application software.** The most common type of software, application software is a computer software package that performs a specific function for a user, or in some cases, for another application. An application can be self-contained, or it can be a group of programs that run the application for the user. Examples of [modern applications](#) include office suites, graphics software, databases and database management programs, web browsers, word processors, software development tools, image editors and communication platforms.
- **System software.** These software programs are designed to run a computer's application programs and hardware. System software coordinates the activities and functions of the hardware and software. In addition, it controls the operations of the computer hardware and provides an environment or platform for all the other types of software to work in. The OS is the best example of system software; it manages all the other computer programs. Other examples of system software include the [firmware](#), computer language translators and system [utilities](#).
- **Driver software.** Also known as device drivers, this software is often considered a type of system software. Device drivers control the devices and peripherals connected to a computer, enabling them to perform their specific tasks. Every device that is connected to a computer needs at least one device driver to function. Examples include software that comes with any nonstandard hardware, including special game controllers, as well as the software that enables standard hardware, such as USB storage devices, keyboards, headphones and printers.
- **Middleware.** The term *middleware* describes software that mediates between application and system software or between two different kinds of application software. For example, middleware enables Microsoft Windows to talk to Excel and Word. It is also used to send a remote work request from an application in a computer that has one kind of OS, to an application in a computer with a different OS. It also enables newer applications to work with legacy ones.

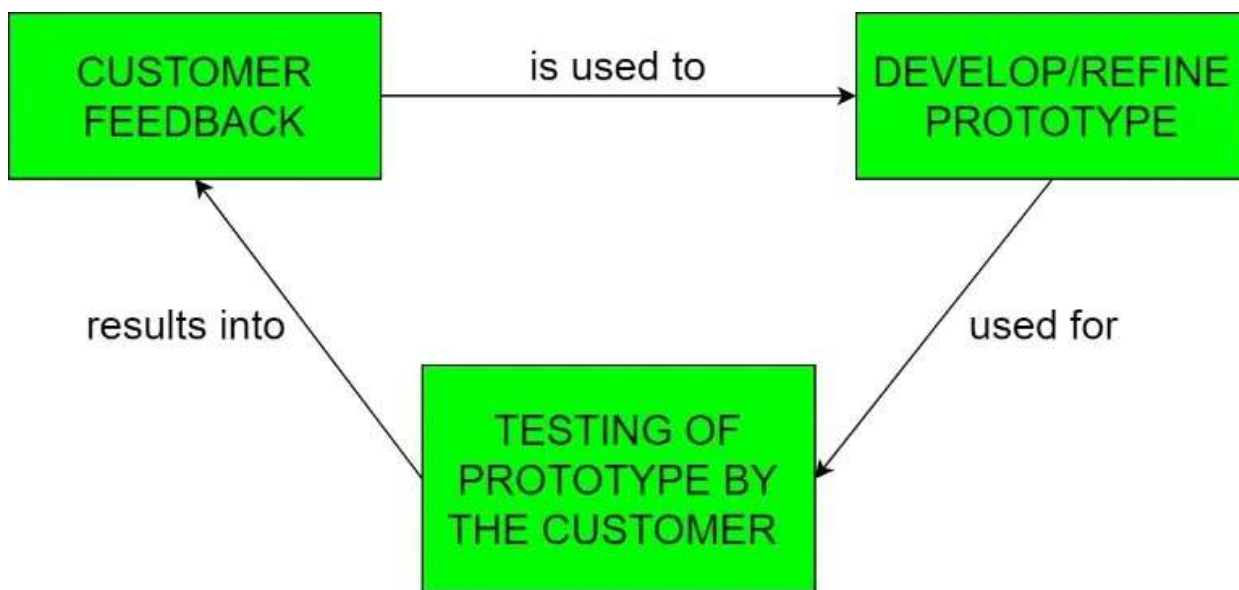

- **Programming software.** Computer programmers use programming software to write code. Programming software and programming tools enable developers to develop, write, test and [debug](#) other software programs. Examples of programming software include assemblers, compilers, debuggers and interpreters.

The dimensions of software quality include the following characteristics:

- **Accessibility.** The degree to which a diverse group of people, including individuals who require adaptive technologies such as voice recognition and screen magnifiers, can comfortably use the software.
- **Compatibility.** The suitability of the software for use in a variety of environments, such as with different OSes, devices and browsers.
- **Efficiency.** The ability of the software to perform well without wasting energy, resources, effort, time or money.
- **Functionality.** Software's ability to carry out its specified functions.
- **Installability.** The ability of the software to be installed in a specified environment.
- **Localization.** The various languages, time zones and other such features a software can function in.
- **Maintainability.** How easily the software can be modified to add and improve features, fix bugs, etc.
- **Performance.** How fast the software performs under a specific load.
- **Portability.** The ability of the software to be easily transferred from one location to another.
- **Reliability.** The software's ability to perform a required function under specific conditions for a defined period of time without any errors.
- **Scalability.** The measure of the software's ability to increase or decrease performance in response to changes in its processing demands.
- **Security.** The software's ability to protect against unauthorized access, invasion of privacy, theft, data loss, malicious software, etc.
- **Testability.** How easy it is to test the software.
- **Usability.** How easy it is to use the software.

Software Engineering | Prototyping Model

- Prototyping is defined as the process of developing a working replication of a product or system that has to be engineered.
- It offers a small-scale facsimile of the end product and is used for obtaining customer feedback. The Prototyping concept is described below:
- The Prototyping Model is one of the most popularly used [Software Development Life Cycle Models \(SDLC models\)](#).
- This model is used when the customers do not know the exact project requirements beforehand.
- In this model, a prototype of the end product is first developed, tested, and refined as per customer feedback repeatedly till a final acceptable prototype is achieved which forms the basis for developing the final product.

Prototyping Concept

- In this process model, the system is partially implemented before or during the analysis phase thereby giving the customers an opportunity to see the product early in the life cycle.
- The process starts by interviewing the customers and developing the incomplete high-level paper model.

- This document is used to build the initial prototype supporting only the basic functionality as desired by the customer.
- Once the customer figures out the problems, the prototype is further refined to eliminate them.
- The process continues until the user approves the prototype and finds the working model to be satisfactory.

What is Software Prototyping?

- A prototype can be a limited-functionality software performance model.
- The prototype does not always contain the exact logic used in the specific software application and is an additional effort to be considered when estimating effort.
- Prototyping is used to allow users to evaluate and test developer proposals before they are implemented.
- It also aids in understanding the user-specific requirements that will not be considered by the developer during product design.

Proper planning and execution are the key components of a successful software development process. The entire software development process includes 6 stages. **Software Development Life Cycle (SDLC)** is the common term to summarize these 6 stages.

SDLC specifies the task(s) to be performed at various stages by a software engineer/developer. It ensures that the end product is able to meet the customer's expectations and fits in the overall budget. Hence, it's vital for a software developer to have prior knowledge of this software development process.

Prototyping Model Phases:

Prototyping Model has six SDLC phases as follows

- **Stage-1: Planning And Requirement Analysis:**
 - Planning is the crucial step in everything and so as in software development. In this same stage, requirement analysis is also performed by the developers of the organization.

- This is attained from the inputs from the customers, sales department/market surveys.
- The information from this analysis forms the building block of a basic project. The quality proof of the project is a result of planning. Thus, in this stage, the basic project is designed with all the available information.

Stage-2: Defining Requirements:

- In this stage, all the requirements for the target software are specified. These requirements get approval from the customers, market analysts, and stakeholders.

This is fulfilled by utilizing [SRS \(Software Requirement Specification\)](#). This is a sort of document that specifies all those things that need to be defined and created during the entire project cycle.

• Stage-3: Designing Architecture:

- SRS is a reference for software designers to come out with the best architecture for the software. Hence, with the requirements defined in SRS, multiple designs for the product architecture are present in the Design Document Specification (DDS).
- This DDS is assessed by market analysts and stakeholders. After evaluating all the possible factors, the most practical and logical design is chosen for the development.

Stage-4: Developing Product:

- At this stage, the fundamental development of the product starts.
- For this, developers use a specific programming code as per the design in the DDS.
- Hence, it is important for the coders to follow the protocols set by the association. Conventional programming tools like compilers, interpreters, debuggers, etc. are also put into use at this stage. Some popular languages like C/C++, Python, Java, etc. are put into use as per the software regulations.

Stage-5: Product Testing and Integration:

- After the development of the product, testing of the software is necessary to ensure its smooth execution. Although, minimal testing is conducted at every stage of SDLC.
- Therefore, at this stage, all the probable flaws are tracked, fixed, and retested. This ensures that the product confronts the quality requirements of SRS.

Documentation, Training and Support:

- Software documentation is an essential part of the software development life cycle.
- A well-written document acts as a tool and means to information repository necessary to know about software processes, functions and maintenance.
- Documentation also provides information about how to use the product. Thoroughly-written documentation should involve the required documentation.
- Software architecture documentation, technical documentation and user documentation.
- Training in an attempt to improve the current or future employee performance by increasing an employee's ability to work through learning, usually by changing his attitude and developing his skills and understanding.

- **Stage 6: Deployment and Maintenance Of Product:**

- After detailed testing, the conclusive product is released in phases as per the organization's strategy. Then it is tested in a real industrial environment.
- Because it is important to ensure its smooth performance. If it performs well, the organization sends out the product as a whole.
- After retrieving beneficial feedback, the company releases it as it is or with auxiliary improvements to make it further helpful for the customers.
- However, this alone is not enough. Therefore, along with the deployment, the product's supervision.

Steps Prototyping Model

Step 1: Requirement Gathering and Analysis: This is the initial step in designing a prototype model. In this phase, users are asked about what they expect or what they want from the system.

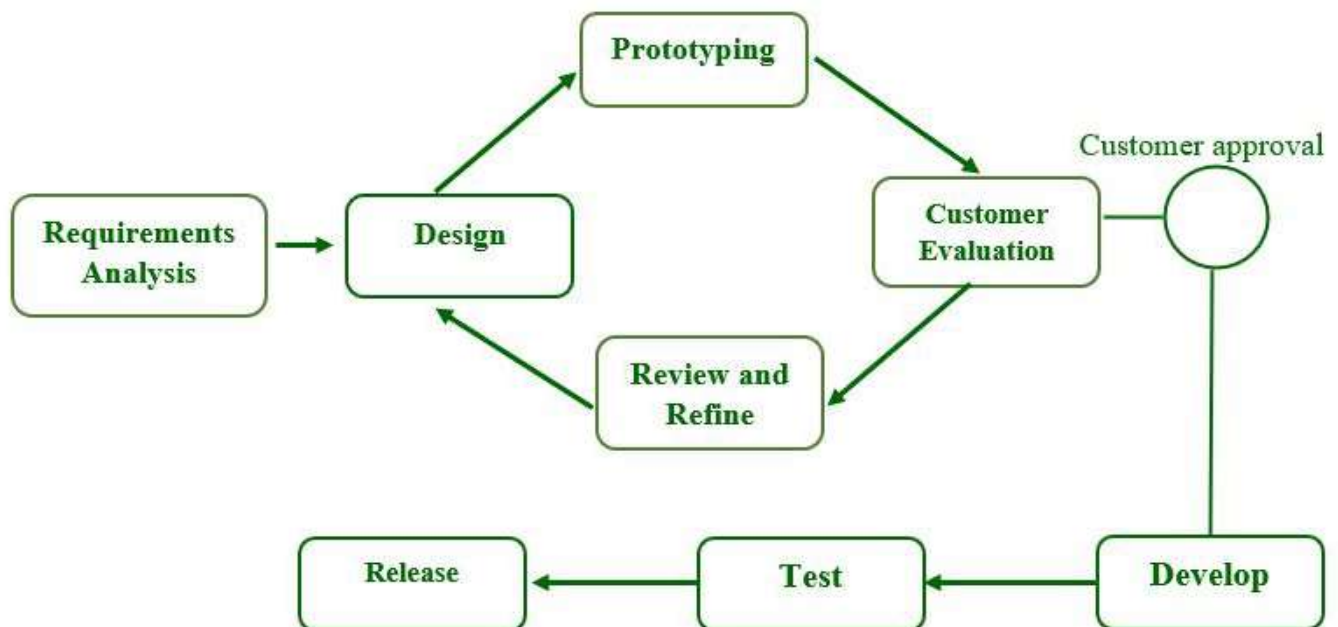

Step 2: Quick Design: This is the second step in Prototyping Model. This model covers the basic design of the requirement through which a quick overview can be easily described.

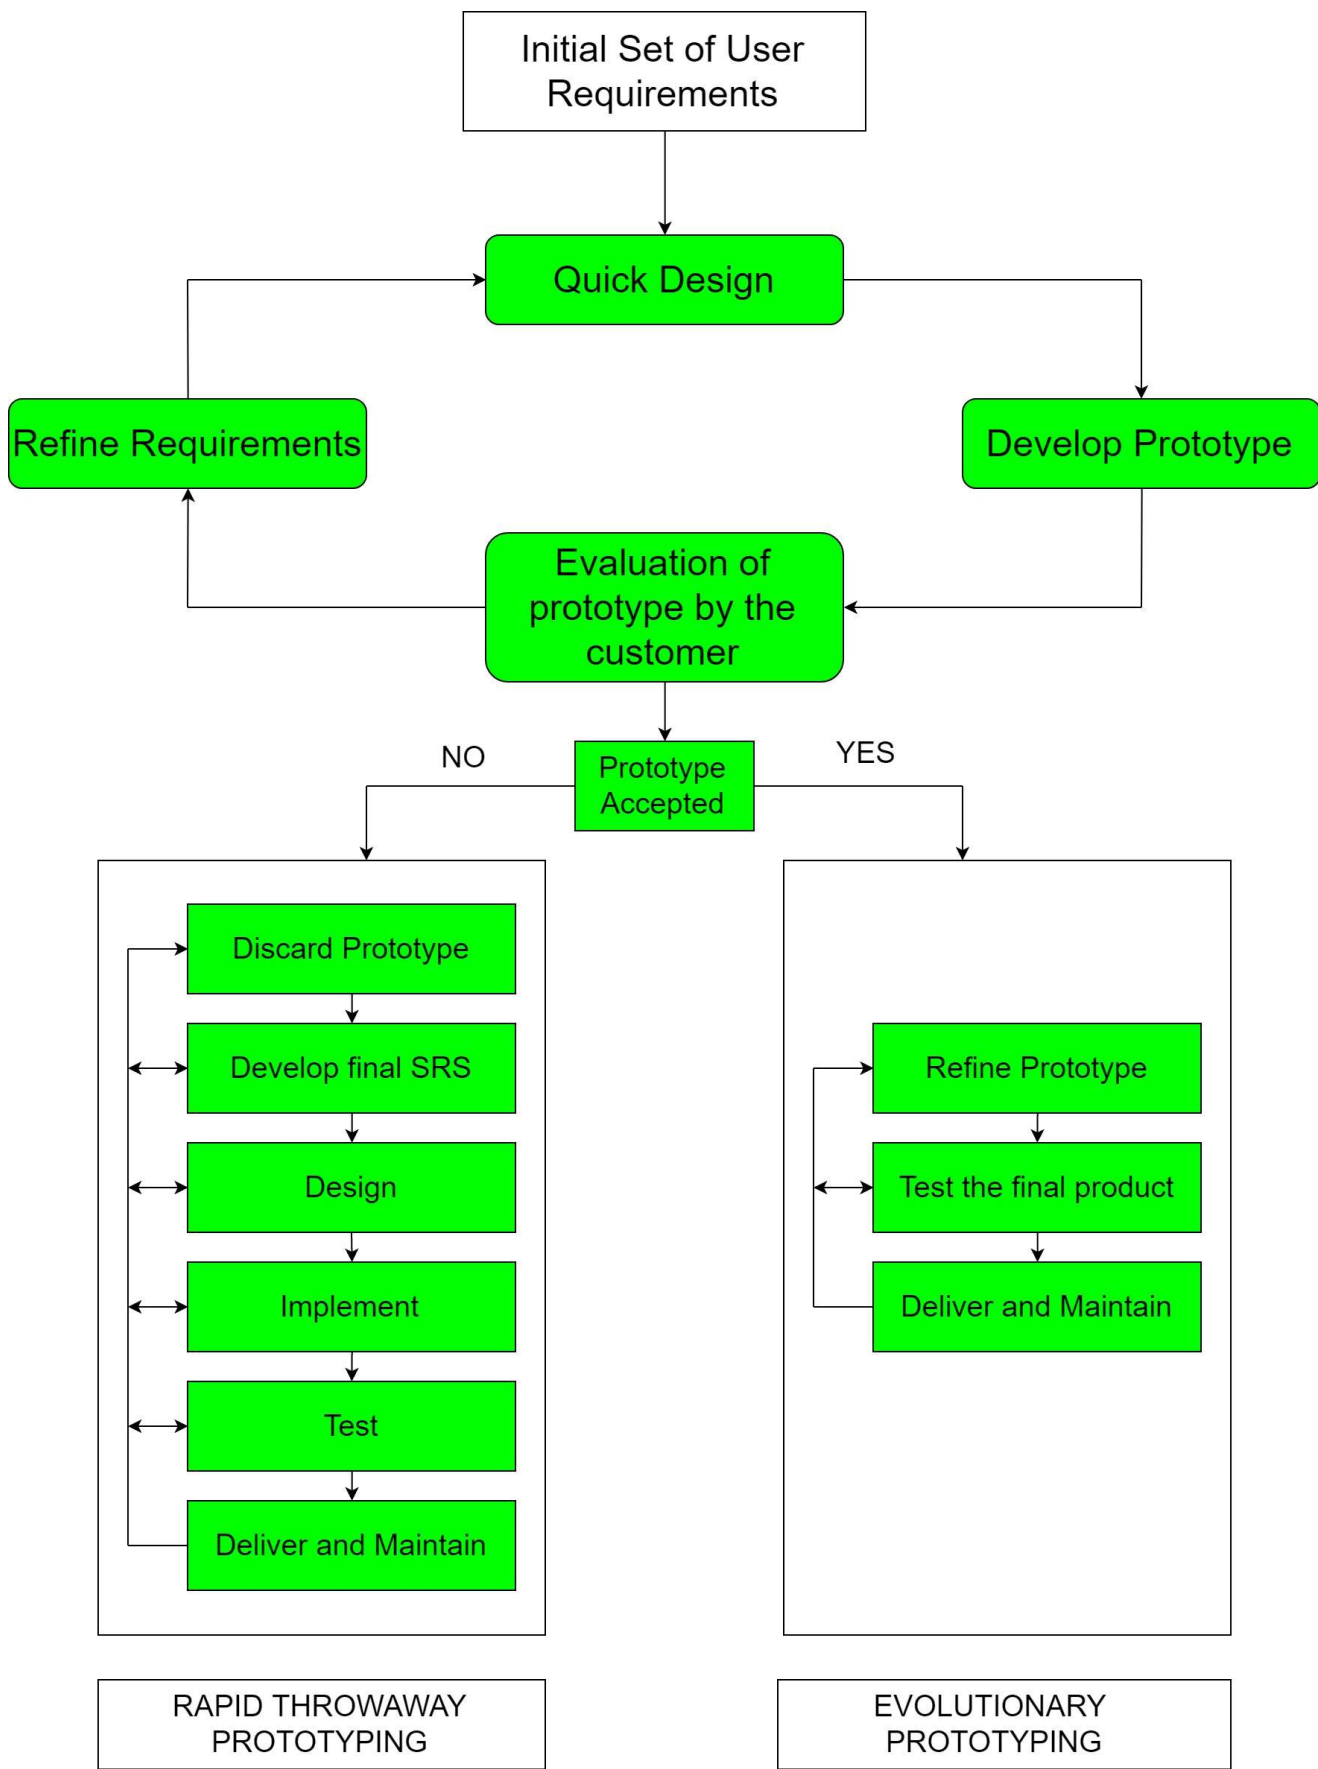

Step 3: Build a Prototype: This step helps in building an actual prototype from the knowledge gained from prototype design.

Step 4: Initial User Evaluation: This step describes the preliminary testing where the investigation of the performance model occurs, as the customer will tell the strength and weaknesses of the design, which was sent to the developer.

Step 5: Refining Prototype: If any feedback is given by the user, then improving the client's response to feedback and suggestions, the final system is approved.

Step 6: Implement Product and Maintain: This is the final step in the phase of the Prototyping Model where the final system is tested and distributed to production, here program is run regularly to prevent failures.

Prototyping Models

Types of Prototyping Models

There are four types of Prototyping Models, which are described below.

- Rapid Throwaway Prototyping
- Evolutionary Prototyping
- Incremental Prototyping
- Extreme Prototyping

1. Rapid Throwaway Prototyping

- This technique offers a useful method of exploring ideas and getting customer feedback for each of them. In this method, a developed prototype need not necessarily be a part of the ultimately accepted prototype.
- Customer feedback helps in preventing unnecessary design faults and hence, the final prototype developed is of better quality.

2. Evolutionary Prototyping

- In this method, the prototype developed initially is incrementally refined on the basis of customer feedback till it finally gets accepted.
- In comparison to Rapid Throwaway Prototyping, it offers a better approach that saves time as well as effort.
- This is because developing a prototype from scratch for every iteration of the process can sometimes be very frustrating for the developers.

3. Incremental Prototyping

- In this type of incremental Prototyping, the final expected product is broken into different small pieces of prototypes and developed individually.
- In the end, when all individual pieces are properly developed, then the different prototypes are collectively merged into a single final product in their predefined order.
- It's a very efficient approach that reduces the complexity of the development process, where the goal is divided into sub-parts and each sub-part is developed individually.
- The time interval between the project's beginning and final delivery is substantially reduced because all parts of the system are prototyped and tested simultaneously.
- Of course, there might be the possibility that the pieces just do not fit together in the development phase – this can only be fixed by careful and complete plotting of the entire system before prototyping starts.

4. Extreme Prototyping

This method is mainly used for web development. It consists of three sequential independent phases:

1. In this phase, a basic prototype with all the existing static pages is presented in HTML format.
2. In the 2nd phase, Functional screens are made with a simulated data process using a prototype services layer.
3. This is the final step where all the services are implemented and associated with the final prototype.

This Extreme Prototyping method makes the project cycling and delivery robust and fast and keeps the entire developer team focused and centralized on product deliveries rather than discovering all possible needs and specifications and adding unnecessitated features.

Advantages of Prototyping Model

- The customers get to see the partial product early in the life cycle. This ensures a greater level of customer satisfaction and comfort.
- New requirements can be easily accommodated as there is scope for refinement.
- Missing functionalities can be easily figured out.
- Errors can be detected much earlier thereby saving a lot of effort and cost, besides enhancing the quality of the software.
- The developed prototype can be reused by the developer for more complicated projects in the future.
- Flexibility in design.
- Early feedback from customers and stakeholders can help guide the development process and ensure that the final product meets their needs and expectations.
- Prototyping can be used to test and validate design decisions, allowing for adjustments to be made before significant resources are invested in development.
- Prototyping can help reduce the risk of project failure by identifying potential issues and addressing them early in the process.

- Prototyping can facilitate communication and collaboration among team members and stakeholders, improving overall project efficiency and effectiveness.
- Prototyping can help bridge the gap between technical and non-technical stakeholders by providing a tangible representation of the product.

Disadvantages of the Prototyping Model

- Costly with respect to time as well as money.
- There may be too much variation in requirements each time the prototype is evaluated by the customer.
- Poor Documentation due to continuously changing customer requirements.
- It is very difficult for developers to accommodate all the changes demanded by the customer.
- There is uncertainty in determining the number of iterations that would be required before the prototype is finally accepted by the customer.
- After seeing an early prototype, the customers sometimes demand the actual product to be delivered soon.
- Developers in a hurry to build prototypes may end up with sub-optimal solutions.
- The customer might lose interest in the product if he/she is not satisfied with the initial prototype.
- The prototype may not be scalable to meet the future needs of the customer.
- The prototype may not accurately represent the final product due to limited functionality or incomplete features.
- The focus on prototype development may shift the focus away from the final product, leading to delays in the development process.
- The prototype may give a false sense of completion, leading to the premature release of the product.
- The prototype may not consider technical feasibility and scalability issues that can arise during the final product development.
- The prototype may be developed using different tools and technologies, leading to additional training and maintenance costs.

- The prototype may not reflect the actual business requirements of the customer, leading to dissatisfaction with the final product.

Applications of Prototyping Model

- The Prototyping Model should be used when the requirements of the product are not clearly understood or are unstable.
- The prototyping model can also be used if requirements are changing quickly.
- This model can be successfully used for developing user interfaces, high-technology software-intensive systems, and systems with complex algorithms and interfaces.
- The prototyping Model is also a very good choice to demonstrate the technical feasibility of the product.

For more software engineering models, you can refer to [Classical Waterfall Model](#), [Spiral Model](#), and [Iterative Waterfall Model](#).

Software Prototyping Application :

- Software prototyping is extremely beneficial in the development of systems that require a high level of user interaction, such as online applications.
- Systems that require users to fill out forms or view various screens before data is processed can benefit greatly from prototyping in order to convey the exact look and feel even before the software is developed.
- Prototyping is usually not an option for software that involves a large amount of information processing and the majority of the functionality is internal with little programme.
- Prototype development can be an additional overhead in such projects and should necessitate a significant amount of additional effort.

Advantages of Software Prototyping :

- Users help to shape the future. As a result, errors can be discovered during the first stage of the software development process.
- Prototyping is also considered a risk reduction function because it allows non-existent performance to be seen, lowering the risk of failure.
- Assists team members in effectively communicating.

- Customer satisfaction exists, and he can feel the product from the start.
- There will be no risk of software loss.
- Quick user feedback aids in the development of better software solutions.

Disadvantages of Software Prototyping :

- Prototyping is a time-consuming and labour-intensive process.
- The cost of creating a specific type of waste is completely wasted because the prototype is eventually discarded.
- Prototyping may result in an overabundance of change requests.
- Customers may be unwilling to commit to the iteration cycle for an extended period of time.
- During each customer test, there may be too many variations in software requirements.
- Poor documentation as a result of changing customer needs.

Uses of Software Prototyping Model:

Some of the uses of the software prototyping model include:

1. **Requirements gathering:** The prototyping model is useful for gathering and refining requirements for a software product.

By creating a prototype, developers can get feedback from end-users and stakeholders, which helps to ensure that the software product meets their needs and requirements.
2. **User testing:** The prototyping model is useful for testing the usability and functionality of the software product.

By creating a prototype, developers can get feedback from end-users, which helps to identify any issues or concerns before the final product is developed.
3. **Risk reduction:** The prototyping model can help to reduce the risk of developing a software product that does not meet the needs of end-users or stakeholders.

By creating a prototype, developers can identify issues and refine the design before the final product is developed, which reduces the risk of costly rework and delays.

4. **Faster development:** The prototyping model can help to speed up the development process.

By creating a prototype, developers can get feedback and refine the design quickly, which helps to reduce the time and effort required to develop the final product.

5. **Cost reduction:** The prototyping model can help to reduce the overall cost of software development.

By identifying issues and refining the design early on in the development process, developers can reduce the risk of costly rework and delays, which can ultimately save time and reduce costs.

Issues of Software Prototyping Model :

1. **Incomplete requirements:** The prototyping model is designed to help refine requirements through feedback from end-users.

However, if the initial requirements are incomplete or inaccurate, the prototype may not fully meet the needs of the end-users or stakeholders.

2. **Scope creep:** Because the prototyping model encourages user feedback and refinement, it can be susceptible to scope creep.

This can occur when new features or requirements are added to the project, which can lead to delays and increased costs.

3. **Increased development costs:** While the prototyping model can help to reduce the overall cost of software development, it can also increase costs in the short term.

This is because the creation of prototypes requires time and effort, which can add to the development costs.

4. **Technical debt:** The prototyping model can also lead to technical debt if the prototype is not properly designed or documented.

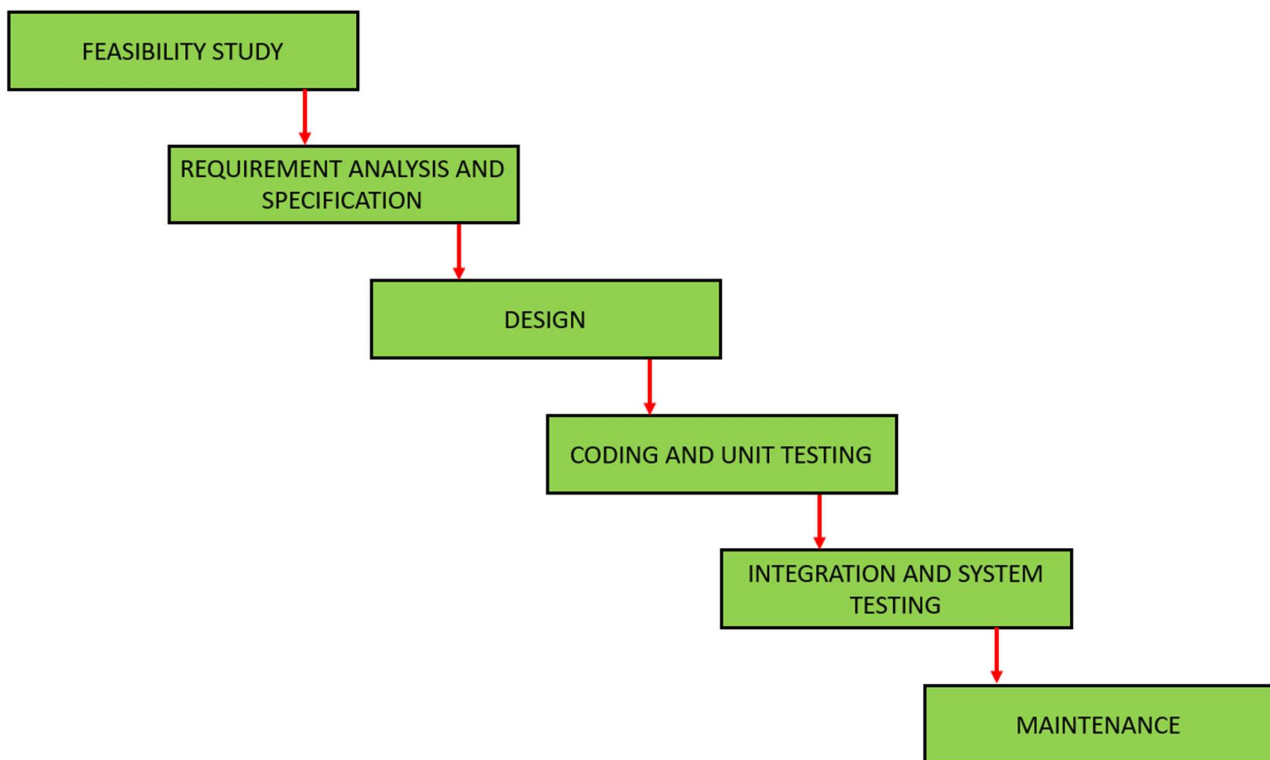

This can create issues down the line when the final product is developed, which can lead to delays and increased costs.

5. **Lack of scalability:** The prototyping model may not be suitable for large or complex software projects.

This is because the focus on rapid prototyping and user feedback may not be sufficient to address the complexities of a larger project.

Features of the Waterfall Model

1. **Sequential Approach:** The waterfall model involves a sequential approach to software development, where each phase of the project is completed before moving on to the next one.
2. **Document-Driven:** The waterfall model relies heavily on documentation to ensure that the project is well-defined and the project team is working towards a clear set of goals.
3. **Quality Control:** The waterfall model places a high emphasis on quality control and testing at each phase of the project, to ensure that the final product meets the requirements and expectations of the stakeholders.
4. **Rigorous Planning:** The waterfall model involves a rigorous planning process, where the project scope, timelines, and deliverables are carefully defined and monitored throughout the project lifecycle.

A One-day In-house MATLAB Training Program

"HARDWARE INTEGRATION USING MATLAB AND SIMULINK"

on

13 October 2023

Organized by

DEPARTMENT OF MECHANICAL ENGINEERING, ECE & EEE

In association with

CBIT IEEE SPS society and IEEE RAS Society

Program Schedule

	Time	Topics
Inaugural schedule	9:40 AM to 9:43 AM	Welcome address by Dr P. Vijay babu
	9:43 AM to 9:45 AM	About Workshop by Smt. Venkata Sushma Chinta
	9:45 AM to 9:50 AM	Address by Principal Dr. C. V. NARASIMHULU garu
	9.50 AM to 9.52 AM	Address by Dr. A. Rajinikanth , Advisor, CBIT IEEE RAS
	9:52 AM to 09:55 AM	Introduction of speaker by Dr T. Aravinda Babu
Training Program Schedule	10:00 AM to 10:45AM	Low-cost hardware support
	Tea break	
	11:00 AM to 12:30 PM	Introduction to Arduino Simulink Library block-set
	Lunch Break	
	2:00 PM to 3:15 PM	Demos & Activities
	Snacks/Tea break	
	3:15 PM to 3:45 PM	Summary
	3:45 PM to 4:00 PM	Valedictory

Co-ordinators:

1. Dr. T. Aravinda Babu, Asst. Prof., Dept. of ECE,
2. Dr. P. Vijay Babu, Asst. Prof., Dept. of EEE
3. Smt. Venkata Sushma Chinta, Asst. Prof., Dept. of Mech. Engg.

Date: 29-09-23,
Hyderabad.

To
The Principal,
CBIT.

Respected Sir,

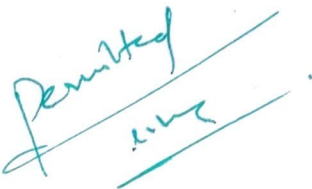

Sub:-“Request for the permission to conduct a One Day In-house workshop on Hardware Integration using MATLAB & Simulink”-Reg

It is proposed to organise a One Day In-house workshop on Hardware Integration using MATLAB & Simulink on 13th October, 2023 in our Institute. In this connection, kindly give the permission to conduct above said workshop.

Thanking you sir,

Yours Sincerely,

1. Dr T. Aravinda Babu, Coordinator 
2. Smt. Ch.V. Sushma, Coordinator 

(through proper channel)

No. / 250 / CB 17 / MED / 2023

24-11-2023

To,

The Principal,

CBIT.

Sir,

Sub: Request to transfer remuneration to the speaker and report submission of the event organised on 17-11-2023.

EDC,CBIT in association with IIC and MED has organised a speaker session on 17-11-2023 with title "Entrepreneurship and innovation" as Career Opportunity . The speaker for the session was G Harihara Iyer Garu. The report of the event along with the photos, participants list is attached with the letter. In this regard we request you to please transfer the remuneration and travelling expenses Rs 3000 + Rs 1500 = Rs 4500 to the speaker account. The account details of the speaker are provided below.

Account holder Name: G Harihara Iyer

Account Number : 631201119326

IFSC Code: ICIC0006312

Bank,Branch : ICICI BANK, Nizampet

Thank you Sir,

Yours sincerely,

Team,EDC (V. Sandhya, Asst prof, MED) .

Enclosure: Report of the event, Permission letter.

(THROUGH PROPER CHANNEL)

To,
The Principal,
Chaitanya Bharathi Institute of Technology (A).

Sir,
Sub: Request for permission to conduct a workshop on 17-11-2023 with title "Entrepreneurship and Innovation in energy" as Career Opportunity and provide financial assistance.

Entrepreneurship development Cell in association with IIC and Mechanical Engg Dept, CBIT is planning to organize a workshop on 17-11-2023 with the title "Entrepreneurship and innovation in energy" as Career Opportunity from 2.00PM onwards for the benefit of our students of all branches. We request you to kindly approve and permit us to conduct the session. The speaker for the session is Sri G Harihara Iyer. We also request you to provide the financial assistance of Rs 4500 for the session i.e., remuneration for the speaker Rs3000 and TA Rs1500.

Thank you sir,

Yours sincerely,

Team - EDC, CBIT

C.V. Sandhya
Asst. prof, MED.

Brief Profile of the Speaker

G. Harihara Iyer started his career as a mechanical engineer, moving on to mining a few years later. He is a certified energy auditor (Bureau of Energy Efficiency of Ministry of Power, Govt. of India), involved in training at industries, engineering and architectural colleges. He is a recipient of many prestigious awards and has published more than 125 papers. He has completed several energy conservation projects.

He is a senior training faculty at Petroleum Conservation and Research Association of Ministry of Petroleum and Natural Gases, Govt. of India. He holds an Assocham Green certificate.

Objective:

1. Create and reinforce the innovative soul among students
2. To identify the role of entrepreneurs in the current scenario
3. To inculcate skillset required for a young graduate and enlighten the importance of entrepreneurship and innovation

Learnings:

1. Increment of mindfulness and how to rehearse the abilities and disciplines important to innovation
2. To answer emphatically and actually to issues in new situations.
3. Foster pioneering and inventive outlook

"Report on Webinar on Low-Cost Automation"

Title: Webinar on Low-Cost Automation

Introduction:

The Mechanical Engineering Department of CBIT, in collaboration with IGUS India Pvt Limited, organized a webinar on "**Low-Cost Automation.**" The webinar took place on the Microsoft Teams platform from 2:00 PM to 3:00 PM on 4th July 2023. Smt. Venkata Sushma Chinta, Assistant Professor of the Mechanical Engineering Department at CBIT, and Mr. Swamy Shiva Prasad, Product Engineer at IGUS India Pvt Limited, coordinated the webinar.

Speakers:

1. Mr. Ragesh Kumar, Low-Cost Automation Manager, IGUS India Pvt Limited
2. Mr. Nirmal Kumar, Sr. Product Engineer, IGUS India Pvt Limited
3. Mr. Balaji, Low-Cost Automation Product Engineer, IGUS India Pvt Limited

Key Participants:

- Dr. P. Prabhakar Reddy, Head of the Mechanical Engineering Department, CBIT
- Dr. P.V.R. Ravindra Reddy, Director of Student Affairs, CBIT
- Mrs. Venkata Sushma Chinta, Assistant Professor, Mechanical Engineering Department at CBIT
- Ms. R. Navaneetha, Assistant Professor, Mechanical Engineering Department, CBIT
- Faculty members of the Mechanical Engineering Department, CBIT
- 4th semester AIML students, CBIT
- 2nd semester IOT students, CBIT

Content:

In today's rapidly evolving landscape, where Industry 4.0, Artificial Intelligence (AI), and Digitization are the focal points of India's development, automation plays a pivotal role. It is

imperative for our young generation to not only acquire theoretical knowledge but also gain hands-on experience in this domain.

During the webinar, the speakers introduced low-cost automation and showcased various robots, including Cartesian Robots, Delta Robots, Robolink, and the IRC-Controller, designed and patented by IGUS India Pvt Limited. They discussed each robot's specifications, degrees of freedom, working principles, advantages, and disadvantages. The speakers also provided live demonstrations of these robots, showcasing their practical applications in industrial automation tasks.

Additionally, the webinar included an introduction to RBTX, a marketplace and platform for low-cost robotic components. While RBTX focuses on connecting users with suppliers and providing tools and services for finding compatible robotic solutions within budget, it is unclear if RBTX itself is based on open-source software or supports integration with open-source robotic software.

The webinar provided valuable insights into low-cost automation techniques, which are increasingly being utilized in various industries. It enhanced students' knowledge and kept them updated with the latest advancements in the field of automation.

Conclusion:

On behalf of the Mechanical Engineering Department at CBIT, we express our heartfelt gratitude to IGUS India Pvt Limited for conducting the training session on "Low-Cost Automation" for our students. The efforts of IGUS in providing training sessions that bridge the gap between theoretical knowledge and practical skills are highly appreciated. The live demonstrations of Gantry systems, Robolink, and Delta robots during the training session allowed students to witness these robots in action and gain a firsthand understanding of their potential.

We believe that the collaboration between IGUS and educational institutions like CBIT holds immense potential, not only in acquiring robots for CBIT but also in fostering joint research projects, internships, and industry-academia partnerships.

Overall, the webinar was a successful event, contributing to the advancement of knowledge in low-cost automation and strengthening the ties between industry and academia.

Yours sincerely,

Smt. Venkata Sushma Chinta,

About CBIT Hyderabad

CBIT is one of the premier Engineering Institutes in India, a pioneer in Telangana State, which is at the idyllic surroundings of Gandipet Lake, Hyderabad. The college offers 12 UG and 10 PG programs. It has been standing as a temple of knowledge for the past 45 years by producing more than 25,000 Eminent and proficient Graduate Engineers, who are successful in their Careers, serving all over the world. CBIT Students are prepared and perfected to secure

Placements in reputed MNCs. The Institute has been accredited by NAAC – UGC with 'A++' Grade and several programs are accredited by NBA – AICTE. The UGC has granted Autonomous Status from the Academic Year 2013-14 onwards. Stringent Academic Standards, Industry Compliant Teaching Methodology, Research Projects from Private and Public Sector organizations Industries in Engineering and Management and Consultancy Practice, enabled the Institute to establish its Identity in Technical Education and is ranked as one of the best amongst Private Engineering Colleges in both the Telugu Speaking States.

About EEE Department

CBIT started the Electrical & Electronics Engineering UG program in 1994 and has been accredited 5 times since 2004 by NBA. The recent accreditation in 2021 is for 6 years. The intake was increased from 60 to 120 in the Academic Year 2013-14. The Department started offering a PG course in Power Systems and power Electronics in 2006 with an intake of 18 and was accredited by the NBA in the year 2016. The department has received grants worth around ₹90 lakhs from AICTE under RPS, SPARC, MODROBS, FDP, STTP, etc. The Department is offering consultancy services worth ₹21 lakhs in collaboration with Foreign Universities in Renewable Energy Systems. The Department is also certified by ISO 9001:2015. The Department is recognized as a Research Centre in 2017 by Osmania University to carry out research for the award of Ph.D. degrees.

Overview of Programme

Over the years, the Institute has gained valuable experience and expertise for MSME promotion in India and the rest of the developing world. NI-MSME's inherent capacity to innovate, together with its state of the art infrastructure, has enabled the Institute to excel in its game changing strategies and instruments of action.

This training program is intended to provide opportunities for participants to impart knowledge about incubation ideas. It also helps to promote self-employment and provides opportunities of training for skilled wage employment.

Objectives of the Programme

- ❖ To enlighten the audience with innovation, incubation and entrepreneurship.
- ❖ To create awareness about the role of MSME in skill development.
- ❖ To demonstrate how to establish incubation centers.
- ❖ To develop 'know how' about of incubation center.
- ❖ Introduce the audience with a helping hand in formulating the business plan.

Outcomes of the Programme

On Successful completion of this program, participants will be able to:

- ❖ Create young entrepreneurs that can contribute for the positive development of the society.
- ❖ Develop the fruitful business plan into the minds of the audience.
- ❖ Acquire the knowledge of smoothly managing of the incubation cells.

Timings

Morning Session: 9:30 a.m. to 12:00 p.m.

Lunch: 12:00 p.m. to 1:00 p.m.

Afternoon Session: 1:00 p.m. to 4:00 p.m.

Venue

Computer Science and Engineering Seminar Hall (C-203)

Resource Persons

- ❖ **Mr. K. Surya Prakash Goud**, Faculty Member, SED, NI-MSME, Hyderabad
- ❖ **Mr. Ramana Murthy**, Consultant, MSME, Hyderabad
- ❖ **Prof. B. Subbarayudu**, Principal Scientist, IIMR
- ❖ **Mrs. Vanamala Swapna**, Associate Faculty, Member, SEM, MSME, Hyderabad
- ❖ **Prof. Umakanta Choudhury**, Professor EEE, Advisor I&I, CBIT, Hyderabad, (Former Executive Director, CTM, BHEL)
- ❖ **Prof. N. V. Srinivasulu**, Professor Mech, CBIT, Hyderabad
- ❖ **Dr. G. N. R. Prasad**, Senior Asst. Professor, MCA, CBIT, Hyderabad

Who Can Attend?

Faculty, Research Scholars, Students and Industry personnel.

Registration

“No Registration Fee”

For Registration & Other Details, Contact:

Dr. Madhulika Das, Ph. No: 7980200299

Dr. Y. A. Khan, Ph. No: 7295996603

Note:

- E-Certificates will be given to the participants, who attend all the sessions.
- Tea and lunch will be provided during FDP to the participants.

ABOUT THE FDP/MDP/ Skill Development Programme

The objective of the program is to focus on continuous Improvement for Organizational Excellence. Kaizen, a Japanese term meaning "change for the better" or "continuous improvement," embodies a philosophy and methodology aimed at achieving continuous enhancement in processes, products, services, and overall organizational performance. Rooted in the principles of Lean manufacturing and Total Quality Management (TQM), Kaizen emphasizes the involvement of every employee, from the frontline workers to top management, in identifying and implementing incremental improvements.

Kaizen advocates for small, gradual improvements rather than radical changes, with the belief that these incremental advancements accumulate over time to yield significant overall improvements. Central to Kaizen is the recognition of the value of every individual within the organization. It encourages the involvement of employees in decision-making processes and fosters a culture where ideas and contributions are respected and valued. Standardization provides a baseline for identifying deviations and opportunities for enhancement. Kaizen emphasizes the importance of going to the gembu, or the actual workplace, to understand processes, identify issues, and collaborate on solutions. Effective implementation of Kaizen requires training employees at all levels on the principles and methodologies of continuous improvement.

Total Quality Management (TQM) is a comprehensive approach to quality management that aims to enhance customer satisfaction by continuously improving all aspects of an organization's processes, products, and services. One of the fundamental tools within TQM is the 5S methodology, which provides a systematic framework for organizing the workplace to improve efficiency, safety, and quality. Total Quality Management (TQM) is a comprehensive approach to quality management that aims to enhance customer satisfaction by continuously improving all aspects of an organization's processes, products, and services. One of the fundamental tools within TQM is the 5S methodology, which provides a systematic framework for organizing the workplace to improve efficiency, safety, and quality.

RESOURCE PERSONS

The sessions will be handled by experts from MSME, academia, research organizations and industry in the subject area.

ABOUT THE INSTITUTE

CBIT is one of the premier Engineering Colleges in the state of Telangana located in the serene surroundings of Gandipet Lake. Over the past 45 years this institute has become a temple of knowledge and produced about 21,000 eminent and skillful graduate and postgraduate engineers, serving all over the world. Various programmes of the college were accredited five times by NBA (AICTE) and the institute is also accredited (A++) by NAAC - UGC. UGC has granted autonomous status to this institute from the academic year 2013-2014 and renewed in 2019-2020. The total constructed area is about 6.257 lakhs sq. ft, Worth about Rs. 45.00 crores spread over 50.32 acres. The grants received from AICTE/UGC/DST are worth about Rs. 10 crores. The college offers Nine UG and Eleven PG courses. The institute has signed MOUs with various esteemed organizations.

ABOUT DEPARTMENT OF MECHANICAL ENGINEERING

The Department of Mechanical engineering, CBIT is offering one UG Program in Mechanical Engineering and with an intake of 120 and two PG programs in CAD/CAM

and Thermal Engineering domains. The department has 47 faculty members out of which 27 are PhDs. The department is growing exponentially in terms of R&D and

consultancy. 24 sponsored research projects worth of Rs. 285 lakhs were awarded to the faculty by DST, AICTE, UGC, DRDO, BHEL etc. 28 patents were published out of

which 9 were granted. Nearly Rs.17 lakhs was earned by the department through consultancy in the last 5 years. 74 events were organized by student's professional societies, under the guidance of department faculty 48 PhDs were awarded and 3 were submitted and 59 more are pursuing. The Department is well equipped with all state-of-the-art equipment's, Laboratories & workshops providing all necessary facilities to the students. The Hexagon Capability Centre India has opened Innovation laboratory

in the premises of the CBIT. The lab has been equipped with hardware and software worth Rs.5.5 crores. B.E Mechanical Engineering, M.E CAD/CAM Programs were accredited by NBA.

ABOUT ENTREPRENEURSHIP DEVELOPMENT CELL

Entrepreneurship Development Cell (EDC), CBIT, is a student coordinated club supervised by experienced faculty members. The motto of the club is Entrepreneur 'rising' ideas. The club has a vision to pave a path towards 'Entrepreneurial India'. The institute aims to groom and support all students with entrepreneurial interests and start up ideas. CBIT owes a lot to the spirit of entrepreneurship as some of the founder members of the institute were entrepreneurs themselves. We have/had numerous successful entrepreneurs among our students.

As part of this, several entrepreneurship awareness camps, seminars, guest lectures, conferences and faculty development programmes etc. were organized. It also involves its students in organising various events so that students are exposed and learns various skills pertaining to planning, execution, leadership, communication and organising.

EDC, CBIT strives to improve continuously based on the emerging trends and need for budding entrepreneurs by organising wide variety of entrepreneurship related events for infusing awareness and required knowledge, skills and attitude so that the young minds steer their endeavours towards culminating as entrepreneurs for the welfare and well-being of all human beings in the society and Nation.

No Registration Fee

Note: The program is open to both faculties and students of CBIT and other colleges MSMEs. As per the guideline, at least 50 percent of seats will be allocated to participants from SC Community.

NIMSME Organizes Training Program on 5S, Kaizen, Lean, and TQM at CBIT

DECCAN NEWS SERVICE
HYDERABAD

The National Institute for Micro, Small and Medium Enterprises (NIMSME) recently conducted a one-week FDP/MDP/Skill Development Programme on 5S, Kaizen, Lean, and TQM at Chaitanya Bharathi Institute of Technology from 19-23 February 2024, adopting a hybrid mode of delivery.

Led by Mr. K. Surya Prakash Goud, Director of NIMSME, and Professor P. Prabhakar Reddy, the sessions included comprehensive training on 5S, Kaizen, and TQM, supplemented by engaging activities and case studies. Participants also embarked on a practical Gemba walk around the CBIT campus, exploring

various labs and observing concepts in action. Dr. B. V. S Rao, Ms. V. Sandhya, Dr. B. Lavanya, and Dr. Y. A Khan served as coordinators, ensuring smooth execution of the program. The event culminated in a valedictory function on 23rd February 2024, where the significance of 5S, Kaizen, and TQM was underscored by Principal Dr. Narsimhlu and HOD Mm ED Dr. Prabhakar

Reddy. The program, marked by insightful learning experiences and practical applications, proved highly beneficial for both faculty and students, fostering a culture of continuous improvement and organizational excellence. The participants expressed gratitude to NIMSME for organizing such a valuable initiative, contributing to their skill development journey.

Week-long FDP on Kaizen and TQM at CBIT

DECCAN NEWS SERVICE
HYDERABAD

The National Institute for Micro, Small and Medium Enterprises (ni-msme), Hyderabad, in collaboration with the Department of Mechanical Engineering and Entrepreneurship Development Cell at Chaitanya Bharathi Institute of Technology (CBIT), organized a one-week Faculty Development Programme (FDP) focusing on 5S, Kaizen, Lean, and Total Quality Management (TQM). The program, aimed at achieving continuous

improvement for organizational excellence, commenced yesterday at the CBIT campus.

Led by convenors SED, ni-MSME, Hyderabad, and Professor & Head, Department of Mechanical Engineering, CBIT, the FDP aims to equip participants with the principles and methodologies of Kaizen and TQM. Kaizen, rooted in Lean manufacturing and TQM principles, emphasizes gradual improvements and employee involvement at all levels to enhance processes, products, and services. The program also highlights the importance of

the 5S methodology in organizing the workplace for improved efficiency, safety, and quality.

Ms. V. Sandhya, Assistant Professor, MED, CBIT, emphasized the comprehensive approach of TQM in enhancing customer satisfaction through continuous improvement across all organizational aspects. The program, following MSME guidelines, is open to both faculty and students from various colleges, with 50 percent of seats allocated to the SC community.

Day 1

Date: 19-02-2024

Session 1 : Registration & Inauguration

The Inauguration was held at the Mechanical Engineering Seminar Hall D-102. During the Inaugural session Prof C.V. Narasimhulu, Principal, CBIT gave welcoming address. Sri. K. Surya Prakash Goud, Faculty Member, SED, ni-MSME, briefed about the FDP. Sri Ramana Murthy explained in detail about the importance of the FDP concepts. Prof. P. Prabhakar Reddy, Professor & Head, Department of Mechanical Engineering, CBIT briefed about the Department. Prof. Umakanta Choudhary, Director I & I, CBIT explained the Innovation, incubation, and entrepreneurial activities in the college. The inaugural session ended with vote of thanks by Dr B.V.S.Rao, Assistant Professor, MED, CBIT.

Session - 2: 5S Training

The session 2 of Day 1 was delivered by Sri Ramana Murthy. Sir, explained the basics of 5s, Ostracize, PEEPs concept. He explained the importance of the topic in Industry and hands on session was organised

Fig: Speaker Sri Ramana Murthy during the session

Day 1 Session – 3 : 5S Training

Dr A.Kiran Kumar, Assistant Professor, Mechanical Engineering, CBIT was the speaker for the session. Sir gave in depth knowledge about 1S theory, 1S Red tagging, 2S theory, 2S Functional Storage, 3S theory, 3S methods, 4S theory, 4S Visual Management, 5S theory, 5S Radar Chart ,5S Case Studies

Fig: Speaker Dr A.Kiran Kumar during the session

DAY 2

DATE 20-02-2024

Session 1: TQM Training

The second day session 1 started with the topic Total Quality Management. Prof. P. Prabhakar Reddy, Professor & Head, Department of Mechanical Engineering, CBIT was the speaker. The topics on Introduction to Quality – Total Quality Management, Introduction TQM Theory – TQM Concepts, TQM Framework, Quality, TQM Dimensions of Quality were described.

Installation Report

Date: 18-05-2024

Minutes of Meeting held between M/s Chaitanya Bharathi Institute of Technology, Hyderabad and M/s Structural Solutions Private Limited.

Members present from CBIT:

1. Dr. A. Kiran Kumar, Asst. Professor
2. Mr. Guru Bramham, Asst. Professor

Members present from SSPL:

1. Mr. Ananth Sai
2. Mr. M. Kiran Kumar

Representatives of M/s Structural Solutions Private Limited reached at site on 18-05-2024 for demonstration of MICROPHONE, TWO CHANNEL SIGNAL CONDITIONER WITH FFT ANALYSIS SOFTWARE. The functioning of equipment was demonstrated in all aspects and carried out the following activities.

1. M/s Structural Solutions Private Limited representative Mr. Ananth Sai, Mr. M. Kiran Kumar has performed the demonstration and the results of the MICROPHONE, TWO CHANNEL SIGNAL CONDITIONER WITH FFT ANALYSIS SOFTWARE were found satisfactory.

In this demo 23 final year students (of BE-VIII Semester) and 12 faculty members from Mechanical Engineering department were participated and list is attached here with.

2. M/s Structural Solutions Private Limited representative also demonstrated all the salient features of MICROPHONE, TWO CHANNEL SIGNAL CONDITIONER WITH FFT ANALYSIS SOFTWARE.

3. M/s Structural Solutions Private Limited representative left the site on dated: 18-05-2024.

M/s Chaitanya Bharathi Institute of Technology, Hyderabad.

List of students who participated in Building acoustics demo.

1. 1601-20-736-061 AFREEN BEGUM
2. 1601-20-736-064 MOUNIKA BADAVATH
3. 1601-20-736-065 NIKHITHA PUNATI

A Guest Lecture by **S. Shankari, Scientist, Project Director, ASL-Hyderabad** on “Technologies & Futuristic Road Map in Aerospace System” is being organized under ASME-CBIT, Department of Mechanical Engineering.

Date: 23-02-2024

Time: 11.00 AM to 12.30 PM

Venue: Main Seminar Hall

Speaker: S. Shankari, Scientist, Project Director, ASL-Hyderabad

All the interested students are directed to attend the event. Attendance will be recorded for those who attend the event. For any further information in this regard, contact the faculty coordinators of the club, Dr. G. Laxmaiah, Professor, 9849959218 Dr. Ch. Indira Priyadarshini, Assistant Professor, 9440701653, Dr. Rahul, Assistant Professor, MED.

Department of Mechanical Engineering

Workshop on "Refrigeration and Air conditioning systems with Industry Perspective"

Date and Venue: 20/4/2024 from 9.30 am to 3.45 pm, MED Seminar Hall

Coordinators: Dr.R.P.Chowdary and Dr.V.V.R.Seshagiri Rao, Associate Professors , **MED**

Guest: Sri L.V.Ramprasad of R&AC Academy, Hyderabad

Participants: 120 students

The Department of Mechanical Engineering of CBIT has organized a one-day workshop on "Refrigeration and Air conditioning systems with Industry Perspective" on 20/4/2024 from 9.30 am to 3.45 pm.

The objective of the workshop is to create better understanding regarding the applications of Refrigeration and Air conditioning systems in day-to-day life and to bring awareness about Project potential and career opportunities in the field.

The department has conducted this event in association with **Sri L.V.Ramprasad of R&AC Academy, Hyderabad. Dr.R.P.Chowdary and Dr.V.V.R.Seshagiri Rao, Associate Professors of the department acted as coordinators for this event.** Sri L.V.Ramprasad is a Renowned expert in the field with over 25 years of industry experience in various capacities having 6 patents to his credit.

Professor C.V.Narasimhulu, Principal CBIT and Professor P.Prabhakar Reddy, HOD, Mechanical Engineering Department have addressed the students and advised the students to update their knowledge through interacting with experts in the field for having better career prospects in future.

A total of s belonging to mechanical stream participated in the program. The speaker has shared his valuable experience in the field along with modern developments in domestic refrigerators, room air conditioners, central Air conditioning systems, air conditioning in automobile systems and also inverter AC systems that have been evolved through technology innovation processes.

The contents delivered by the speaker in the workshop were well received by the participants and the students have interacted with the speaker regarding various technical aspects and project opportunities in the area.

Brochure:

The brochure is for a one-day workshop titled "Workshop on R & AC Systems for Developing Industry Perspective" organized by the Department of Mechanical Engineering at Chaitanya Bharathi Institute of Technology. The event is scheduled for April 20th, 2024, and is led by Sri Ramprasad LV. The workshop is a career orientation program for students. The brochure features the institute's logo, accreditation logos (NSR, NAAC, NIRF, ISO), and technical diagrams of refrigeration and air conditioning systems. The co-ordinators are Dr. R. P. Chowdary and Dr. V. V. R. Seshagiri Rao. The R&AC Academy logo is also present with the tagline "Awakens the Engineer in You."

DEPARTMENT OF MECHANICAL ENGINEERING

CIRCULAR

Date: 27-04-2024

All the Mechanical Engineering Students of BE IV & VI Sem (F1 & F2), are here by informed that a guest lecture on **“Career Guidance for Mechanical Engineering Students”** is scheduled on 29th April 2024 at D-102 Seminar Hall between 11.15 AM to 12.15 PM. The Guest Lecture will be delivered by **“Faculty Members from ACE Academy”**. All Students are requested to attend the program without fail. Attendance will be taken the end of the session.

Dr. NV Srinivasulu

Dr. BVS Rao

Dr. P. Prabhakar Reddy

HEAD, MED

Objective and Outcomes:

The guest lecture was attended by Mechanical IV & VI Semester Students. This session was on Career Guidance. The speaker gave details on the various opportunities after completing their graduation and how the students could get placed in the Public Sector.

Speaker Profile:

Mr. S Mani Mohan Trinath is an esteemed faculty member at ACE Engineering Academy and a motivational speaker with a flair for teaching and interacting with students pan India. He has 14+ years of GATE/ESE/PSU teaching experience. Mr. Trinath has completed Masters in Electronics from Andhra University & Post Graduation in Artificial Intelligence & Machine Learning from the University of Texas, Austin. His passion for interacting with students and motivating them in their career endeavors has helped him to connect with students pan India and he does it all whilst blending it with Technology as his core domain.

He received the Best Teacher Award in 2019 by ESN Publications (SELECTED AND AWARDED BY DR.P.KOTHARI, ex.IIT DELHI DIRECTOR, former VICE CHANCELLOR OF VIT, PRESIDENT ESN AWARDS).

He has also bagged the World Book of Records in 2020 for participating as Keynote Speaker(s) in a Mass Event organized by ESN Publications as one of the Longest International Conferences following the duration of 150 Hours continuously

AWARD LETTER

Dated: 20.09.2024

F. No. 6/VVB@2047/2024-2118/EP- A /SCD

To,
The Director
Chaitanya Bharathi Institute of Technology,
Telangana - 500075

Subject: Award of Research Project (Collaborative) titled ‘Transforming Education: Exploring the Impact of E-Learning Platforms in Bharat: A Study on Andhra and Telangana’ under the special call for Vision Viksit Bharat@2047 (VVB@2047) to Dr. T.S. Poornachandrika, Dr. Sowmya Kethi Reddi, Dr. Ramesh Babu, Dr. Venkata Sushma Chinta, Dr. Nagini Yarramsetty.

ICSSR congratulates you on successfully obtaining the award of Research Project under Special Call for Vision Viksit Bharat@2047, under **Category A**, on the basis of recommendations of the Expert Committee.

1. The Indian Council of Social Science Research (ICSSR) has approved the award of ‘**Research Project**’ under the **Special Call on Vision Viksit Bharat@2047**” the Research Project submitted by **Dr. T.S. Poornachandrika** of your Institution.

The study, as proposed by the researcher, is to be located at and financially administered by your institution as per the guidelines of this award.

2. The ICSSR has awarded a grant-in-aid of **Rs. 1500000/-** for the above research project and the grant will be released as follows:

First instalment (75 % of sanctioned grant-in-aid) : Rs. 1125000/-

Second (final) instalment (25 % of sanctioned grant-in-aid): Rs. 375000/-

Total Rs. 1500000/-

Overhead charges over and above

7.5% or maximum Rs.1,00,000 : -

3. Please note the approval of ICSSR is subject to fulfilment of eligibility criteria and other conditions, the Sanction Order will be issued after receipt of following original documents:

- Duly notarized undertaking on non-judicial stamp paper of Rs.100
- Duly notarized declaration on non-judicial stamp paper of Rs.100
- Acceptance of the Awarded Project with the Date of Commencement
- Original forwarding Letter duly signed/ stamped by statutory authority.
- Grant-in-aid bill (Pre-receipt) duly filled in for the first instalment.

*** This is computer generated letter, hence signature not required.**

f. Letter/ certificate regarding status of the affiliating Institute and a proof of institution's eligibility to receive the grant of ICSSR.

You are once again required to review the eligibility criteria as per the guidelines of the **Special Call for "Vision Viksit Bharat@2047"** and ensure that you fulfil all requirements as per the guidelines, both as an individual and as an institution for the studies. If you or your institution is not eligible to receive ICSSR grant as per **point 4.** of the guidelines, please recuse yourself from receiving the award. Concealing any information or violation of any ICSSR VVB@47 guideline will not only cancel the project but ICSSR may further take action against the institution or individual.

4. If you have been awarded another project under any other program of ICSSR, and the Sanction Letter for that project has been issued, you are requested to proceed with the earlier sanction and inform us accordingly. In such situation, the current award will not be considered operational.
5. If you have already been awarded a project, and the sanction letter has not been issued yet, you may choose between the two awards and clearly inform us which project you would like to proceed with.
6. All the Payments and Transfers are to be done through the Public Financial Management System (PFMS). The institution has to open a dedicated account and link the same with the PFMS account of ICSSR. The institutions' whose existing bank account is already registered under PFMS must ensure that their account is linked with the ICSSR scheme-0877 at the PFMS portal. In case of any issues / problems in execution of PFMS, you may go through the authentic video tutorial available online.
7. The **First installment** of the approved grant-in-aid will be released after receiving the grant-in-aid bill duly filled in, stamped and signed by the Project Director as well as the affiliating organization.
8. It is mandatory for the team to attend regular review meetings organized by ICSSR to ensure timely progress and completion of projects.
9. As the study involves empirical research, the finalized schedules/questionnaires (2 copies) designed to elicit information should be sent to the ICSSR as per the following schedule
 - (a) If the schedule /questionnaire for eliciting information is as per standard questionnaire, these will have to be sent to ICSSR immediately,
 - (b) If the schedule /questionnaire for eliciting information are to be designed afresh keeping in view the requirements of the project, these will have to be sent to the ICSSR within a period of **two months** in any case.
10. The Final **Instalment** will be released on receipt of following documents: -
 - (a) Satisfactory book length of the Final Report (One Soft Copy in Pen-Drive) in the publishable form after incorporating all corrections, suggestions of the expert;
 - (b) The draft final report shall be submitted four weeks prior to the project's completion to ensure it can be reviewed by the expert;
 - (c) Soft and two hard copies of Executive Summary of Final Report;
 - (d) Statement of accounts with Utilization Certificate in GFR of 12A form for the entire project amount duly signed by the Finance Officer/Registrar/Principal/Director of the affiliating institution;
 - (e) A certificate of statement of assets and books purchased out of the project fund issued by the affiliating institution; and
 - (f) The Grant-in-Aid Bill for the final installment duly filled in, stamped and signed by the Project Coordinator as well as the affiliating institution
11. Research undertaken by a Project Coordinator will be reviewed by the Monitoring and Advisory Committee constituted by ICSSR and the project may be discontinued/ terminated, if research progress is found unsatisfactory or any ICSSR rules/ guidelines are violated by the Project Coordinator of the affiliating institution.
12. The Project Coordinator would organize a Seminar/Conference at the beginning of the research project to collect the ideas related to the theme selected for Vision Viksit Bharat@2047. The Seminar/Conference would focus on the presentation of high-quality research papers not exceeding 25 papers ready for publication. There shall be ICSSR representative/s on the editorial board.
13. The ICSSR reserves all rights to publish the project funded by it, provided the work is recommended for publication by the ICSSR appointed expert/experts. In case, ICSSR approves the publication of the research work, the scholar should acknowledge that the project has been sponsored by the ICSSR, in all publications resulting from the project

** This is computer generated letter, hence signature not required.*

output (Research Paper, Books, Articles, Reports, etc.) and should submit a copy of the same to the ICSSR.

14. The Contingency Grant may be utilized for research and office assistance, books, stationary, computer cost, research assistance and the field work expenses of Project Coordinator, Project Directors and research personnel connected with the research work.
15. The University/ Institution of affiliation will provide office space including furniture, devices, library and research facilities and messenger services to the scholar. For this, the ICSSR shall pay the affiliating University/Institution, **overhead charges @7.5%** of the total expenditure incurred on the project on its successful completion, **with a ceiling of maximum Rs. 1,00,000.00/-**.
16. The accounts and the Utilization Certificate will be signed by the Finance Officer/ Registrar /Principal /Director in the cases where the accounts of the institution are audited by CAG/AG of India. In all other cases, the accounts and the Utilisation Certificate will be signed by the Finance Officer and the Chartered Account.
17. The Project Coordinator of the research project will be **Dr. T.S. Poornachandrika**, who will be responsible for the completion of the research project within **8 to 12 months** from the date of commencement of the project, which is **10/09/2024** as intimated by the scholar.
18. Progress reports shall be submitted to ICSSR every 3 months by the project coordinator. There shall be minimum 2 and maximum 3 progress reports depending upon the duration of the project.
19. In case, the Project Coordinator fails to submit the periodic / final project report as per schedule with adequate justification, the scholar will be debarred from availing all financial assistance from ICSSR in future.
20. All grants from ICSSR are subject to the general provision of GFR 2017 and in particular with reference to the provision contained in GFR 209, GFR 210, GFR 211 and GFR 212.
21. The Project Coordinator will ensure that the expenditure incurred by him/her conforms to the approved budget heads as per the guidelines for the “Special Call for Collaborative Research Projects on Vision Viksit Bharat@2047” published by the ICSSR on its website www.icssr.org.
22. The grant-in-aid is subject to all the conditions laid down in the **Indian Council of Social Science Research (ICSSR) Research Projects available in the ICSSR website www.icssr.org**. The expenditure on this account is debatable to the **Budget Head-ICSSR (Scheme Code 0877); OH 31.09 Research Projects**.
23. All instalments will be transferred through the Public Finance Management System (PFMS) and ICSSR shall implement the EAT module for ensuring transparency of expenditure at all levels and to ensure that there is no parking of funds.
24. As per the instruction from MoE, the amount of grant sanctioned herein is to be utilized by **the end of the project duration**. The unspent amount shall be refunded to the ICSSR immediately on the expiry of the duration of the project. If the grantee fails to utilize the grant for the purpose for which the same has been sanctioned/or fails to submit the audited statement of expenditure within the stipulated period/ or fails to submit the final report within the stipulated time, the grantee will be required to refund the amount of the grant released with a penal interest thereon @ 10% per annum.

Yours faithfully,

(Dr. Richa Sharma)

**PROJECT
BUDGET**

Title: Transforming Education: Exploring the Impact of E-Learning Platforms in Bharat: A Study on Andhra and Telangana.

By: Dr. T.S. Poornachandrika

S. No.	Heads of Expenditure	Value
1	Research Staff: Full-time/Part-time/Hired Services	Not exceeding 40% of the total budget.
2	Fieldwork: Travel/Logistics/Boarding, Survey Preparation or Consultancy etc.	Not exceeding 30%
3	Organizing the Seminar/Conference towards the beginning of the Project to accumulate the ideas (25 Best Research paper presentations only)	Up to 15% (not exceeding INR 2.25 lakh)
4	Equipment and Study Material:	Not exceeding 10%
5	Contingency	Not exceeding 5%
6	Institutional Overheads (over and above the total cost of the project)	Affiliating Institutional overheads @ 7.5 % of the approved budget

➤ **Remuneration and Emoluments of Project Staff**

- Project staff could be engaged by the Project Director on a full/ Part-time basis during the research work and the duration/ consolidated monthly emoluments of their employment may be decided by the Project Director within the limits of the sanctioned financial allocation and as per the ICSSR rules. The remuneration and emoluments of the Project staff are to be paid as per following scales: -
- **Research Associate @ Rs.47,000/- p.m.** (Qualification - Postgraduate in subject relevant to the research area of the Project or any Social Science discipline with minimum 55% with NET /M.Phil./ Ph.D. and 2 years of research experience).
- **Research Assistant @ Rs.37,000/- p.m.** (Qualification-Ph.D./M.Phil / Postgraduate in subject

** This is computer generated letter, hence signature not required.*

relevant to the research area of the Project or any Social Science discipline with a minimum of 55% marks)

- **Field Investigator @ Rs.20,000/-p.m.** (for duration not exceeding 6 months) (Qualification- Postgraduate in a social science discipline with a minimum of 55%).
- **Re-appropriation:** The project Investigator may, with the permission of the institution, re-appropriate expenditure from sub head to another, subject to a maximum 10% of the particular budget heads. If the study necessitates re-appropriation beyond 10%, it may be done only after the prior approval of the ICSSR.
- **Selection of Research Staff** should be done through an advertisement and a selection committee consisting of (1) Project Coordinator/ Project Director; (2) One outside Expert (other than the Institute where the project is located); (4) Head of the Department/Dean of relevant faculty.
- **For all field work related expenses** of Project Coordinator/Project Director, Co-Project Director and project personnel, rules pertaining to affiliating institutes shall be followed.
- **All equipment and books** purchased out of the project fund shall be the property of the affiliating institutions. On completion of the study, the Project Coordinator/ Project Director shall submit an undertaking in this regard. The ICSSR, however, reserves the right to take charge of equipment and books, if it deems necessary.
- **Purchase of equipment/ assets** for the Research Project is permissible only if it is originally proposed and approved by the ICSSR and does not exceed the permissible amount.

** This is computer generated letter, hence signature not required.*
